## Basic Algebra

1. If Lynn can type a page in $p$ minutes, what piece of the page can she do in 5 minutes?
A. $5 / \mathrm{p}$
B. p-5
C. $p+5$
D. $\mathrm{p} / 5$
E. 1- $p+5$
2. If Sally can paint a house in 4 hours, and John can paint the same house in 6 hour, how long will it take for both of them to paint the house together?
A. 2 hours and 24 minutes
B. 3 hours and 12 minutes
C. 3 hours and 44 minutes
D. 4 hours and 10 minutes
E. 4 hours and 33 minutes
3. Employees of a discount appliance store receive an additional $20 \%$ off of the lowest price on an item. If an employee purchases a dishwasher during a $15 \%$ off sale, how much will he pay if the dishwasher originally cost $\$ 450$ ?
A. $\$ 280.90$
B. \$287
C. $\$ 292.50$
D. $\$ 306$
E. \$333.89
4. The sales price of a car is $\$ 12,590$, which is $20 \%$ off the original price. What is the original price?
A. $\$ 14,310.40$
B. $\$ 14,990.90$
C. $\$ 15,290.70$
D. $\$ 15,737.50$
E. \$16,935.80
5. Solve the following equation for $A: 2 A / 3=8+4 A$
A. -2.4
B. 2.4
C. 1.3
D. -1.3
E. 0
6. If Leah is 6 years older than Sue, and John is 5 years older than Leah, and the total of their ages is 41 . Then how old is Sue?
A. 8
B. 10
C. 14
D. 19
E. 21
7. Alfred wants to invest $\$ 4,000$ at $6 \%$ simple interest rate for 5 years. How much interest will he receive?
A. $\$ 240$
B. $\$ 480$
C. $\$ 720$
D. $\$ 960$
E. \$1,200
8. Jim is able to sell a hand-carved statue for $\$ 670$ which was a $35 \%$ profit over his cost. How much did the statue originally cost him?
A. $\$ 496.30$
B. $\$ 512.40$
C. $\$ 555.40$
D. $\$ 574.90$
E. $\$ 588.20$
9. The city council has decided to add a $0.3 \%$ tax on motel and hotel rooms. If a traveler spends the night in a motel room that costs $\$ 55$ before taxes, how much will the city receive in taxes from him?
A. 10 cents
B. 11 cents
C. 15 cents
D. 17 cents
E. 21 cents
10. A student receives his grade report from a local community college, but the GPA is smudged. He took the following classes: a 2 hour credit art, a 3 hour credit history, a 4 hour credit science course, a 3 hour credit mathematics course, and a 1 hour science lab. He received a " B " in the art class, an " A " in the history class, $a$ " C " in the science class, a " B " in the mathematics class, and an " A " in the science lab. What was his GPA if the letter grades are based on a 4 point scale? ( $A=4, B=3, C=2, D=1, F=0$ )
A. 2.7
B. 2.8
C. 3.0
D. 3.1
E. 3.2
11. Simon arrived at work at 8:15 A.M. and left work at 10: 30 P.M. If Simon gets paid by the hour at a rate of $\$ 10$ and time and $1 / 2$ for any hours worked over 8 in a day. How much did Simon get paid?
A. $\$ 120.25$
B. $\$ 160.75$
C. $\$ 173.75$
D. $\$ 180$
E. $\$ 182.50$
12. Grace has 16 jellybeans in her pocket. She has 8 red ones, 4 green ones, and 4 blue ones. What is the minimum number of jellybeans she must take out of her pocket to ensure that she has one of each color?
A. 4
B. 8
C. 12
D. 13
E. 16
13. If $r=5 z$ then $15 z=3 y$, then $r=$
A. $y$
B. 2 y
C. 5 y
D. 10 y
E. 15 y
14. If 300 jellybeans cost you $x$ dollars. How many jellybeans can you purchase for 50 cents at the same rate?
A. $150 / \mathrm{x}$
B. 150 x
C. $6 x$
D. $1500 / \mathrm{x}$
E. 600x
15. Lee worked 22 hours this week and made $\$ 132$. If she works 15 hours next week at the same pay rate, how much will she make?
A. $\$ 57$
B. $\$ 90$
C. \$104
D. $\$ 112$
E. \$122
16. If $8 x+5 x+2 x+4 x=114$, the $5 x+3=$
A. 12
B. 25
C. 33
D. 47
E. 86
17. You need to purchase a textbook for nursing school. The book cost $\$ 80.00$, and the sales tax where you are purchasing the book is $8.25 \%$. You have $\$ 100$. How much change will you receive back?
A. $\$ 5.20$
B. \$7.35
C. $\$ 13.40$
D. $\$ 19.95$
E. \$21.25
18. You purchase a car making a down payment of $\$ 3,000$ and 6 monthly payments of $\$ 225$. How much have you paid so far for the car?
A. \$3225
B. $\$ 4350$
C. \$5375
D. $\$ 6550$
E. \$6398
19. Your supervisor instructs you to purchase 240 pens and 6 staplers for the nurse's station. Pens are purchased in sets of 6 for $\$ 2.35$ per pack. Staplers are sold in sets of 2 for 12.95 . How much will purchasing these products cost?
A. $\$ 132.85$
B. $\$ 145.75$
C. $\$ 162.90$
D. $\$ 225.25$
E. \$226.75
20. If $y=3$, then $y 3(y 3-y)=$
A. 300
B. 459
C. 648
D. 999
E. 1099

Answers \& Explanations

1. A: The following proportion may be written: $1 / p=x / 5$. Solving for the variable, $x$, gives $x p=5$, where $x=5 / \mathrm{p}$. So, Lynn can type 5/p pages, in 5 minutes.
2. A: Sally can paint $1 / 4$ of the house in 1 hour. John can paint $1 / 6$ of the same house in 1 hour. In order to determine how long it will take them to paint the house, when working together, the following equation may be written: $1 / 4 x+1 / 6 x=1$. Solving for $x$ gives $5 / 12 x=1$, where $x=2.4$ hours, or 2 hours, 24 minutes.
3. D: Sale Price $=\$ 450-0.15(\$ 450)=\$ 382.50$, Employee Price $=\$ 382.50-0.2(\$ 382.50)=\$ 306$
4. D: $\$ 12,590=$ Original Price -0.2 (Original Price) $=0.8$ (Original Price), Original Price $=\$ 12,590 / 0.8=$ \$15,737.50
5. A: In order to solve for $A$, both sides of the equation may first be multiplied by 3 . This is written as $3(2 A / 3)=3(8+4 A)$ or $2 A=24+12 A$. Subtraction of $12 A$ from both sides of the equation gives $-10 A=24$. Division by -10 gives $A=-2.4$.
6. A: Three equations may initially be written to represent the given information. Since the sum of the three ages is 41, we may write, $I+s+j=41$, where I represents Leah's age, s represents Sue's age, and $j$ represents John's age. We also know that Leah is 6 years older than Sue, so we may write the equation, I $=s+6$. Since John is 5 years older than Leah, we may also write the equation, $j=I+5$. The expression for $I$, or $s+6$, may be substituted into the equation, $j=I+5$, giving $j=s+6+5$, or $j=s+11$. Now, the expressions for 1 and $j$ may be substituted into the equation, representing the sum of their ages. Doing so gives: $s+6+s+s+11=41$, or $3 s=24$, where $s=8$. Thus, Sue is 8 years old.
7. E: Simple interest is represented by the formula, I = Prt, where P represents the principal amount, $r$ represents the interest rate, and $t$ represents the time. Substituting $\$ 4,000$ for $P, 0.06$ for $r$, and 5 for $t$ gives $I=(4000)(0.06)(5)$, or $I=1,200$. So, he will receive $\$ 1,200$ in interest.
8. A: $\$ 670=$ Cost $+0.35($ Cost $)=1.35($ Cost $)$, Cost $=\$ 670 / 1.35=\$ 496.30$
9. D: The amount of taxes is equal to $\$ 55^{*} 0.003$, or $\$ 0.165$. Rounding to the nearest cent gives 17 cents.
10. C: The GPA may be calculated by writing the expression, $((3 * 2)+(4 * 3)+(2 * 4)+(3 * 3)+(4 * 1)) / 13$, which equals 3 , or 3.0.
11. C: From 8:15 A.M. to 4:15 P.M., he gets paid $\$ 10$ per hour, with the total amount paid represented by the equation, $\$ 10 * 8=\$ 80$. From 4:15 P.M. to 10:30 P.M., he gets paid $\$ 15$ per hour, with the total amount paid represented by the equation, $\$ 15^{*} 6.25=\$ 93.75$. The sum of $\$ 80$ and $\$ 93.75$ is $\$ 173.75$, so he was paid $\$ 173.75$ for 14.25 hours of work.
12. D: If she removes 13 jellybeans from her pocket, she will have 3 jellybeans left, with each color represented. If she removes only 12 jellybeans, green or blue may not be represented.
13. A: The value of $z$ may be determined by dividing both sides of the equation, $r=5 z$, by 5 . Doing so gives $r / 5=z$. Substituting $r / 5$ for the variable, $z$, in the equation, $15 z=3 y$, gives $15(r / 5)=3 y$. Solving for $y$ gives $r=y$.
14. A: 50 cents is half of one dollar, thus the ratio is written as half of 300 , or 150 , to $x$. The equation representing this situation is $300 / x^{*} 1 / 2=150 / x$.
15. B: The following proportion may be used to determine how much Lee will make next week: $22 / 132=15 / x$. Solving for $x$ gives $x=90$. Thus, she will make $\$ 90$ next week, if she works 15 hours.
16. $C$ : The given equation should be solved for $x$. Doing so gives $x=6$. Substituting the $x$-value of 6 into the expression, $5 x+3$, gives $5(6)+3$, or 33 .
17. C: The amount you will pay for the book may be represented by the expression, 80+(80*0.0825). Thus, you will pay $\$ 86.60$ for the book. The change you will receive is equal to the difference of $\$ 100$ and $\$ 86.60$, or $\$ 13.40$.
18. B: The amount you have paid for the car may be written as $\$ 3,000+6(\$ 225)$, which equals $\$ 4,350$.
19. A: You will need 40 packs of pens and 3 sets of staplers. Thus, the total cost may be represented by the expression, $40(2.35)+3(12.95)$. The total cost is $\$ 132.85$.
20. C: Substituting 3 for $y$ gives 33 (33-3), which equals $27(27-3)$, or $27(24)$. Thus, the expression equals 648.
