## Unit 6a Synoptic Assessment

Monday 26 June 20069.00 am to 10.00 am

## For this paper you must have:

- an objective test answer sheet,
- a calculator.

Time allowed: 1 hour

## Instructions

- Use a black ball-point pen. Do not use pencil.
- Fill in the boxes at the top of this page.
- Answer all 40 questions.
- For each item there are four responses. When you have selected the response which you think is the best answer to a question, mark this response on your answer sheet.
- Mark all responses as instructed on your answer sheet. If you wish to change your answer to a question, follow the instructions on your answer sheet.
- Do all rough work in this book, not on your answer sheet.
- Make sure that you hand in both your answer sheet and this answer book at the end of this examination.
- The Periodic Table/Data Sheet is provided on pages 3 and 4. Detach this perforated sheet at the start of the examination.

## Information

- Each correct answer will score one mark. No deductions will be made for wrong answers.
- Graph paper is available from the Invigilator.

## Advice

- Do not spend too long on any question. If you have time at the end, go back and answer any question you missed out.
