Mark Scheme

2005 examination - June series

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Key to Mark Scheme

sca substantially correct approach	pi		
	sca		substantially correct approach

Abbreviations used in Marking

MC - x	deducted x marks for mis-copy
MR - x	deducted x marks for mis-read
isw	ignored subsequent working
bod	given benefit of doubt
wr	work replaced by candidate
fb	formulae book

Application of Mark Scheme

No method shown:	
Correct answer without working	mark as in scheme
Incorrect answer without working	zero marks unless specified otherwise
More than one method / choice of solution:	
2 or more complete attempts, neither/none crossed out	mark both/all fully and award the mean mark rounded down
1 complete and 1 partial attempt, neither crossed out	award credit for the complete solution only
Crossed out work	do not mark unless it has not been replaced
Alternative solution using a correct or partially correct method	award method and accuracy marks as appropriate

Q	Solution	Marks	Total	Comments
1(a)	$3 \times 5 + 2 \times (-5) = 5v$	M1		Three term conservation of momentum
		4.1		equation
	5	A1		Correct equation
	$v = \frac{5}{5} = 1 \text{ ms}^{-1}$	A1	3	Correct velocity
(b)	$3 \times 5 + 2 \times (-5) = 2\nu + 3 \times 0.5$	M1		Four term conservation of momentum
		A 1		equation
	3.5	A1 m1		Correct equation Solving for velocity
	$v = \frac{3.5}{2} = 1.75 \text{ ms}^{-1}$	A1	4	Correct velocity
	Total		7	
2(a)	$0^2 = 7^2 + 2(-9.8)s$	M1	1	Use of constant acceleration equation with
	0 - 7 + 2(-9.8)s			v = 0
	$s = \frac{49}{19.6} = 2.5$	A1		Correct s
	Max Height = $5 + 2.5 = 7.5$ m	D1	2	
	$\operatorname{Max}\operatorname{Height} = 5 + 2.5 - 7.5 \operatorname{III}$	B1	3	ag Adding 5 to get total height
(b)	0 = 7 - 9.8t	M1		Use of constant acceleration equation with
(~)	7			v = 0
	0 = 7 - 9.8t $t = \frac{7}{9.8} = 0.714 \text{ s}$	A1	2	ag Correct time from correct working
	2.0			
(c)(i)	$5.5 = 4.9t^2$	M1		Finding time to fall 5.5 metres
	$5.5 = 4.9t^2$ $t = \sqrt{\frac{5.5}{4.9}} = 1.059$			- ·
	$t = \sqrt{\frac{5.5}{4.9}} = 1.059$	A1		Correct time
	Total Time = $0.7143 + 1.059 = 1.77$ s	m1		Finding total time
	$10tar 11mc = 0.7143 \pm 1.039 = 1.773$	A1	4	Correct time
(a)		M1		Use of constant acceleration based on
(c)(ii)	$v^2 = 0^2 + 2 \times 9.8 \times 5.5$	M1		Use of constant acceleration based on catch at the correct height
		A1		Correct equation
	$v = \sqrt{107.8} = 10.4 \text{ ms}^{-1}$	A1	3	Correct speed
	Total		12	
3(a)	$T - 800 \times 9.8 = 800 \times 0.2$	M1		Three term equation of motion
	T = 7840 + 160 = 8000 N	A1 A1	3	Correct equation ag Correct tension
(b)	$T = 7840 + 100 = 8000 \text{ N}$ $T - 800 \times 9.8 = 800 \times (-0.2)$	M1	5	Three term equation of motion
	T = 7840 - 160 = 7680 N	A1	2	Correct tension
(c)	T = 7840 - 100 = 7680 N $T = 800 \times 9.8 = 7840$ N	B1	1	Correct tension
	Total		6
