**MATHEMATICS AND STATISTICS
(SPECIFICATION B)
Unit Pure 2**

MBP2

Friday 11 June 2004 Morning Session

In addition to this paper you will require:

- an 8-page answer book;
- the AQA booklet of formulae and statistical tables.

You may use a standard scientific calculator **only**.

Time allowed: 1 hour 15 minutes

Instructions

- Use blue or black ink or ball-point pen. Pencil should only be used for drawing.
- Write the information required on the front of your answer book. The *Examining Body* for this paper is AQA. The *Paper Reference* is MBP2.
- Answer **all** questions.
- All necessary working should be shown; otherwise marks for method may be lost.
- The **final** answer to questions requiring the use of tables or calculators should normally be given to three significant figures.

Information

- The maximum mark for this paper is 60.
- Mark allocations are shown in brackets.

Advice

- Unless stated otherwise, formulae may be quoted, without proof, from the booklet.

Answer **all** questions.

1 Find, in its simplest form,

$$\int_2^6 \frac{1}{x} dx \quad (3 \text{ marks})$$

2 The second term of a geometric series is 16 and the sixth term is 1.

(a) Show that one possible value for the common ratio, r , of the series is $-\frac{1}{2}$ and state the other value. (4 marks)

(b) In the case when $r = -\frac{1}{2}$, find the sum to infinity of the series. (3 marks)

3 The diagram shows part of the curve with equation $y = (x - 1)(x + 2)^2$.

(a) Write down the **two** values of x where $y = 0$. (2 marks)

(b) Solve the inequality

$$(x - 1)(x + 2)^2 > 0 \quad (1 \text{ mark})$$

(c) Hence solve the inequality

$$(x - 1)(x + 2)^2 \geq 0 \quad (2 \text{ marks})$$

- 4 The diagram shows a shaded segment of a circle of radius r cm. The segment is formed by drawing an arc on one side of an equilateral triangle of side r cm with the centre at the opposite vertex.

- (a) Show that the ratio of the length of the arc to the side of the triangle is $\pi:3$. (2 marks)
- (b) Show that the area of the triangle is $\frac{\sqrt{3}}{4}r^2$ cm². (2 marks)
- (c) Given that the area of the shaded segment is 10 cm², find, to 3 significant figures, the value of r . (3 marks)
- 5 (a) (i) Verify that $\frac{1}{4}x < \ln x$ when $x = 2$. (1 mark)
- (ii) Verify that $\frac{1}{4}x > \ln x$ when $x = 10$. (1 mark)
- (iii) Draw on the same diagram sketches of the graphs with equations $y = \frac{1}{4}x$ and $y = \ln x$ for $x > 0$. (2 marks)
- (iv) Hence state the number of roots of the equation

$$\frac{1}{4}x = \ln x, \quad x > 0 \quad (1 \text{ mark})$$

- (b) The curve, C , with equation

$$y = \ln x - \frac{1}{4}x, \quad x > 0$$

has only one stationary point.

- (i) Find $\frac{dy}{dx}$. (2 marks)
- (ii) Find $\frac{d^2y}{dx^2}$. (1 mark)
- (iii) Find the x -coordinate of the stationary point. (2 marks)
- (iv) Determine whether the stationary point is a maximum or a minimum. (2 marks)

- 6 (a) Given that $(x + 2)$ is a factor of

$$p(x) = 6x^3 + kx^2 - 9x + 2$$

show that $k = 7$. (2 marks)

- (b) Find the value of $p\left(\frac{1}{2}\right)$ and hence show that $(2x - 1)$ is a factor of $p(x)$. (2 marks)

- (c) Express $p(x)$ as a product of three linear factors. (2 marks)

- (d) Hence find the values of θ , in radians, in the interval $0 < \theta < 2\pi$ for which

$$6 \sin^3 \theta + 7 \sin^2 \theta - 9 \sin \theta + 2 = 0 \quad (6 \text{ marks})$$

- 7 The diagram shows a sketch of the curve with equation $y = 8 - e^{3x}$ which crosses the y -axis at the point A and the x -axis at the point B .

- (a) Find the y -coordinate of A . (1 mark)

- (b) Find the **exact** value of the x -coordinate of B . (2 marks)

- (c) Show that the gradient of the curve at B is -24 . (2 marks)

- (d) (i) Find $\int (8 - e^{3x}) dx$. (2 marks)

- (ii) Hence show that the area of the shaded region, **R**, bounded by the curve $y = 8 - e^{3x}$ and the coordinate axes is

$$8 \ln 2 - \frac{7}{3} \quad (3 \text{ marks})$$

- (e) (i) Sketch the graph of the curve $y = |8 - e^{3x}|$. (2 marks)

- (ii) Solve the equation $|8 - e^{3x}| = 19$, giving your answer in an **exact** form. (2 marks)

END OF QUESTIONS
