Mark Scheme

2006 examination - June series

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Key to mark scheme and abbreviations used in marking

M	mark is for method		
m or dM	mark is dependent on one or more M marks and is for method		
A	mark is dependent on M or m marks and is for accuracy		
B	mark is independent of M or m marks and is for method and accuracy		
E	mark is for explanation		
✓ or ft or F	follow through from previous		
	incorrect result	MC	mis-copy
CAO	correct answer only	MR	mis-read
CSO	correct solution only	RA	required accuracy
AWFW	anything which falls within	FW	further work
AWRT	anything which rounds to	ISW	ignore subsequent work
ACF	any correct form	FIW	from incorrect work
AG	answer given	BOD	given benefit of doubt
SC	special case	WR	work replaced by candidate
OE	OE	FB	formulae book
A2,1	2 or 1 (or 0) accuracy marks	NOS	not on scheme
-x EE	deduct x marks for each error	G	graph
NMS	no method shown	c	candidate
PI	possibly implied	sf	significant figure(s)
SCA	substantially correct approach	dp	decimal place(s)

Application of Mark Scheme

No method shown:

Correct answer without working
 Incorrect answer without working

mark as in scheme
 zero marks unless specified otherwise

More than one method / choice of solution:

2 or more complete attempts, neither/none crossed out

mark both/all fully and award the mean mark rounded down

1 complete and 1 partial attempt, neither crossed out

award credit for the complete solution only

Crossed out work

do not mark unless it has not been replaced

Alternative solution using a correct or partially correct method

award method and accuracy marks as appropriate

AS Use of Mathematics**Applying Mathematics (UOM4/1)****Answers and Marking Scheme****Question 1**

(a)	Sketch graph of $g(x) = x^2$	B1	Need + and – values of x through origin.
(b)	Reflection in the x -axis followed by stretch in the y -direction (accept “vertical”) scale factor 0.05	B1 B1+B1	Allow reverse order Allow squash Stretch if –0.05 in y direction B3. Stretch if 0.05 in negative y direction B3. Reflection and stretch in x direction of $\sqrt{20}$ B3.
	TOTAL	4	

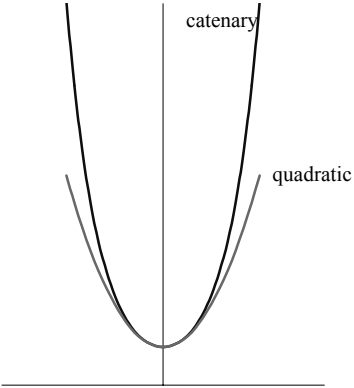

Question 2

	x - coordinate: $\frac{162}{2 \times 6} = \frac{81}{6} = 13.5$ y - coordinate: $\frac{-60}{6} = -10$	M1 A1 B1	M1 Division by 6 (or for multiplying 13.5 by 6)
	TOTAL	3	

Question 3

	$e^{-x} \approx 1 + (-x) + \frac{(-x)^2}{2}$ $\approx 1 - x + \frac{x^2}{2}$ $\frac{e^x + e^{-x}}{2} \approx \frac{\left[\left(1 + x + \frac{x^2}{2} \right) + \left(1 - x + \frac{x^2}{2} \right) \right]}{2}$ $\approx 1 + \frac{x^2}{2}$	<p>M1</p> <p>A1</p> <p>M1</p> <p>A1</p>	
TOTAL		4	

Question 4

		<p>B1</p> <p>B1</p> <p>B1</p>	<p>General shape of two curves</p> <p>(0,1) indicated as point of intersection</p> <p>Clear indication that catenary steeper</p>
TOTAL		3	

Question 5

	$-5 = -0.05x^2$ $\therefore x^2 = \frac{5}{0.05} = 100$ $x = \pm 10$ so length of road = $2 \times 10 \times 6$ = 120 metres	M1 A1 M1 A1	Can be found from figure 2 Condone lack of \pm
	TOTAL	4	

Question 6

	percentage error: $\left(\frac{1.54 - 1.48}{1.48}\right) \times 100 = \frac{0.06}{1.48} \times 100 = 4.05$	B1 B1	for $\frac{1.54 - 1.48}{1.48}$ $\frac{0.06}{1.48} \times 100 = 4.05$
	TOTAL	2	

Question 7

	$90 \div 6 = 15$ $-15 = -0.075x^2$ $x = 14.14$ or $\sqrt{200}$ span = $2 \times 6 \times 14.14 = 169.7$ to 170 metres	M1 M1 A1 A1 (f.t.)	416 scores SC2 (not taking account of initial scaling) 208 SC1 69.3 SC1
	TOTAL	4	
	TOTAL MARK FOR PAPER	24
