General Certificate of Education
January 2007
Advanced Subsidiary Examination

PHYSICS (SPECIFICATION A) **PHA3/W**
Unit 3 Current Electricity and Elastic Properties of Solids

Friday 12 January 2007 1.30 pm to 2.30 pm

For this paper you must have:
- a calculator
- a pencil and a ruler.

Time allowed: 1 hour

Instructions
- Use blue or black ink or ball-point pen.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- Answer the questions in the spaces provided.
- Show all your working.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information
- The maximum mark for this paper is 50.
- Two of these marks will be awarded for using good English, organising information clearly and using specialist vocabulary where appropriate.
- The marks for questions are shown in brackets.
- A *Data Sheet* is provided on pages 3 and 4. You may wish to detach this perforated sheet at the start of the examination.
- Questions 2(b) and 5(b) should be answered in continuous prose. In these questions you will be marked on your ability to use good English, to organise information clearly and to use specialist vocabulary where appropriate.

Data Sheet

- A perforated *Data Sheet* is provided as pages 3 and 4 of this question paper.
- This sheet may be useful for answering some of the questions in the examination.
- You may wish to detach this sheet before you begin work.

5 A material in the form of a long wire is suspended from a support so that it hangs vertically with a mass holder attached to the lower end. Masses, up to a certain value, are added to the holder and then removed again, until only the mass holder remains. The extension of the wire is measured as each mass is added and again as they are removed.
The table shows the extension of the wire as the masses are added and removed.

load/N	0	26	50	73	93	108	118	90	51	0
extension/mm	0	2.4	4.6	6.8	8.6	10.4	13.6	10.8	7.0	2.0

(a) On the grid opposite, plot a graph of load against extension for both increasing and decreasing loads. *(5 marks)*

(b) With reference to the graph, describe the behaviour of the wire as the load is increased and then decreased.
