## **Sociology 6191**

**SCY6      Crime and Deviance;  
Stratification and Differentiation**

## **Mark Scheme**

*2007 examination - June series*

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available to download from the AQA Website: [www.aqa.org.uk](http://www.aqa.org.uk)

#### COPYRIGHT

AQA retains the copyright on all its publications. However, registered centres for AQA are permitted to copy material from this booklet for their own internal use, with the following important exception: AQA cannot give permission to centres to photocopy any material that is acknowledged to a third party even for internal use within the centre.

Set and published by the Assessment and Qualifications Alliance.

## SCY6

### GUIDANCE NOTES IN THE USE OF GENERAL AND QUESTION SPECIFIC MARK SCHEMES FOR UNIT 6.

#### TWO RELATED MARK SCHEMES ARE PROVIDED

Examiners are required to consult and apply the two related mark schemes as follows:

**A General Mark Scheme** made up of two sections on:

- (i) Knowledge and Understanding;
- (ii) Identification, Analysis, Interpretation and Evaluation.

**A Question Specific Mark Scheme** made up of one section on:

- (i) Knowledge and Understanding. This will enable examiners to assess the knowledge and understanding requirements of particular questions.

#### Marking

In the process of marking a particular question, you must follow the procedure detailed below in marking the different Skill Domains:

- (i) **Knowledge and Understanding**

Refer to the Question Specific Mark Scheme and the General Mark Scheme.

- (ii) **Identification, Analysis, Interpretation and Evaluation**

Refer to the General Mark Scheme.

Each answer should be assessed separately for each of the two Skill Domains and the mark for each Skill Domain recorded and totalled to give an overall mark. For example in the case of an answer which was rewarded 6 marks for Knowledge And Understanding and 6 for Identification, Analysis, Interpretation and Evaluation, the total mark for this answer would be 12.

---

## GENERAL MARK SCHEME FOR UNIT 6

### Knowledge and Understanding

**0** No relevant knowledge or understanding.

**1 – 5** Answers in this band will show a very limited sociological knowledge and understanding. Answers will show little or no knowledge or understanding of the connections between the synoptic and other substantive topic(s), sociological thought or research methods as appropriate.

Lower in the band, knowledge will consist of commonsensical points. Answers will show only minimal understanding of either the question or the material offered in response to it.

Higher in the band, knowledge will consist of a few isolated quasi-sociological points, with omissions and perhaps with significant errors. Understanding both of the question and of material offered in response to it will be very simplistic and perhaps confused.

**6 – 10** Answers in this band will show a somewhat limited sociological knowledge and understanding. Answers will show a limited knowledge and understanding of the connections between the synoptic and other substantive topic(s), sociological thought or research methods as appropriate.

Lower in the band, there will be a shallow knowledge of a limited amount of sociological material, perhaps with errors. Understanding both of the question and the material presented in response to it will be superficial.

Higher in the band, there will be a reasonably accurate but rather shallow and descriptive knowledge of a still limited amount of sociological material, or alternatively a slightly deeper but very narrow knowledge. There may be a generalised understanding of the question, or one which shows a specific understanding of only a very limited aspect of the question.

**11 – 16** Answers in this band will show a reasonably good sociological knowledge and understanding. Answers will show an accurate but undeveloped knowledge and understanding of the connections between the synoptic and other substantive topic(s), sociological thought or research methods as appropriate.

Lower in the band, there will be a reasonably accurate knowledge of a range of sociological material with some limited success in conveying conceptual detail, or alternatively a more conceptually detailed but narrowly based knowledge. Knowledge shown may be either theoretical, empirical or both. Answers will show a specific understanding of some of the demands of the question and of the material offered in response, but other aspects will be neglected or treated in a generalised fashion.

Higher in the band there will be somewhat greater success in conveying conceptual detail, or a slightly greater breadth of knowledge; however, answers will remain somewhat limited in range or depth. Knowledge shown will be both theoretical and empirical. There will be a specific understanding of most of the principal demands or aspects of the question, but some others will be neglected or treated in a generalised fashion.

**17 – 20** Answers in this band will show very good sociological knowledge and understanding. Answers will show a clear and detailed knowledge and understanding of the connections between the synoptic and other substantive topic(s), sociological thought or research methods as appropriate.

Lower in the band, there will be a wide-ranging theoretical and empirical knowledge which will, with only very minor exceptions, be thorough, accurate and conceptually detailed. Accurate and explicit links will be made between some of the theoretical and empirical material. There will be a clear understanding both of the question, including its theoretical context, and of the material offered in response.

Higher in the band, knowledge will be comprehensive and will be thorough, accurate and conceptually detailed throughout. There will be a clear understanding of the theoretical context of the question, and there will be accurate and explicit links between the theoretical and empirical parts of the answer. Answers will show a clear, full and complex understanding of the question and the material offered.

---

## GENERAL MARK SCHEME FOR UNIT 6

### Identification, Analysis, Interpretation and Evaluation

**0** No relevant identification, analysis, interpretation or evaluation.

**1 – 5** Answers in this band will show very limited skills of identification, analysis, interpretation and evaluation.

Lower in the band, answers will show, at best, only a rudimentary ability to demonstrate any of the four skills.

Higher in the band, answers will show an ability to demonstrate one or more of the four skills to only an elementary standard. For example, there may be a very limited identification of a study or perspective. There may be a basic interpretation or analysis of an aspect of the question or of the material offered in answer to it. Evaluation may consist of a single brief critical point.

Throughout this band, there may be numerous significant errors, omissions and confusions in the attempt to demonstrate the relevant skills. Answers are very unlikely to demonstrate more than one or two of the skills, even to a very limited degree.

**6 – 10** Answers in this band will show somewhat limited skills of identification, analysis, interpretation and evaluation.

Lower in the band, answers will show a limited ability to demonstrate any of the four skills. For example, a few features of a study or perspective may be identified, or a couple of brief evaluative points made.

Higher in the band, skills will remain generally undeveloped but either a wider range of skills will be shown to a limited degree, or one or two skills only may show some incomplete development, as for example an interpretation of a study or theory in a way appropriate to the set question.

Throughout this band, there may be some significant errors, omissions and confusions in the attempt to demonstrate the relevant skills. Evidence of all four skills may be present to a limited degree; alternatively, there may be reasonable evidence of one or two skills but no evidence of others.

**11 – 16** Answers in this band will show reasonably good skills of identification, analysis, interpretation and evaluation.

Lower in the band, all or most skills will be present with some incomplete development. Alternatively, one or two skills will be explicitly and well developed, with more limited demonstration of others. For example, there may be some explicit but one-sided evaluation and some appropriate analysis of a number of relevant issues.

Higher in the band, there may be a fuller development of one or two skills, for example a thorough, explicit and balanced evaluation, whilst some other skills are present but still incomplete.

Throughout this band, skills will be demonstrated in a generally accurate and relevant way, but there will be some errors, incomplete development or inappropriate aspects.

**17 – 20** Answers will show very good skills of identification, analysis, interpretation and evaluation.

Lower in the band, most skills will be successfully and explicitly demonstrated but not all will be fully developed. For example, evaluation may remain somewhat one-sided.

Higher in the band, all skills will be demonstrated in a thorough, comprehensive and explicit manner throughout, with sensitivity and sophistication and following a clear rationale.

Throughout this band, all four skills will be demonstrated in an accurate, appropriate manner.

---

## QUALITY OF WRITTEN COMMUNICATION

Where candidates are required to produce extended written material in English, the scheme of assessment must make specific reference to the assessment of the quality of written communication. Candidates must be required to:

- select and use a form and style of writing appropriate to purpose and complex subject matter;
- organise relevant information clearly and coherently, using specialist vocabulary when appropriate;
- ensure text is legible, and spelling, grammar and punctuation are accurate, so that meaning is clear.

The assessment criteria for quality of written communication apply to the assessment of parts (b) and (c) of the questions. The following criteria should be applied in conjunction with the mark schemes (the general mark scheme and the question specific mark scheme).

The quality of written communication bands must be regarded as integral to the appropriate mark scheme band even though they are listed separately in the mark scheme. Examiners should note that, in the assessment of candidates' sociological knowledge and skills, the assessment of the Quality of Written Communication will be judged through the assessment of the clarity and appropriateness of the sociological material presented.

### Questions 1 (b) and 2 (b)

**In the 1 – 4 band**, candidates' answers are likely to be characterised by the poor logical expression of ideas and the use of a limited range of conceptual terms, perhaps often used imprecisely and/or inaccurately. Spelling, punctuation and grammar may show serious deficiencies and frequent errors, perhaps impairing the intelligibility of significant parts of the answer.

**In the 5 – 9 band**, candidates' answers are likely to be characterised by the fair to good logical expression of ideas and the competent use of a reasonable range of conceptual terms. Spelling, punctuation and grammar will be of a reasonable standard. Commonly used words and sociological terms will generally be spelt correctly. There may be minor errors of punctuation and grammar, but these will not seriously impair the intelligibility of the answer.

**In the 10 – 12 band**, candidates' answers are likely to be characterised by the very good to excellent logical expression of ideas and the precise use of a broad range of conceptual terms. Spelling, punctuation and grammar will be of a very good to excellent standard. Commonly and less commonly used words and sociological terms will almost always be spelt correctly. Punctuation and grammar will be used correctly throughout to facilitate the intelligibility of the answer.

### Questions 1 (c) and 2 (c)

**In the 1 – 5 band**, candidates' answers are likely to be characterised by the very poor logical expression of ideas and the use of a very limited range of conceptual terms, perhaps often used imprecisely and/or inaccurately. Spelling, punctuation and grammar may show serious deficiencies and frequent errors, impairing the intelligibility of significant parts of the answer.

**In the 6 – 10 band**, candidates' answers are likely to be characterised by the generally fair logical expression of ideas, though perhaps with some occasional flaws, and the use of a somewhat limited range of conceptual terms, perhaps sometimes used imprecisely and/or inaccurately. Spelling, punctuation and grammar will be fair. Commonly used words and sociological terms will mostly be spelt correctly. There may be some errors in punctuation and grammar which impair the intelligibility of some parts of the answer.

**In the 11 – 16 band**, candidates' answers are likely to be characterised by the reasonable to good logical expression of ideas and the competent use of a reasonable range of conceptual terms. Spelling, punctuation and grammar will be of a good standard. Commonly used words and sociological terms will be spelt correctly. Punctuation and grammar will be of a good standard facilitating a competent expression of ideas.

**In the 17 – 20 band**, candidates' answers are likely to be characterised by the very good to excellent logical expression of ideas and the precise use of a broad range of conceptual terms. Spelling, punctuation and grammar will be of a very good to excellent standard, with commonly and less commonly used words and sociological terms almost always spelt correctly. Meaning will be clear throughout.

---

Choose **one** Section and answer **all** parts of the question from that Section.

---

**SECTION A: CRIME AND DEVIANCE**

---

**Total for this section: 60 marks**

**1** Read **Item A** and answer parts (a) to (c) which follow.

- |  |
|--|
| <p>(a) Identify and briefly explain <b>two</b> problems of using official statistics in the study of suicide. <span style="float: right;">(8 marks)</span></p> <p><i>This part of the question includes assessment of your understanding of the connections between Crime and Deviance and sociological methods.</i></p> |
|--|

Two marks for each of two appropriate problems identified, such as:

- they may lack detail about the deceased that the sociologist considers important;
- not all instances of suicide may have been recorded;
- incorrect categorisation of cases;
- suicide statistics are a social construct;
- the official definition of suicide may differ from that of the sociologist;
- some states may not have collected suicide statistics.

Two further marks for each of these satisfactorily explained, such as:

- they may lack detail about the deceased that the sociologist considers important: eg Durkheim found that some French suicide statistics did not record the religion of the deceased, which was of importance to his hypothesis about the causes of suicide;
- not all instances of suicide may have been recorded: eg an attempted suicide may not come to the attention of officials because the individual survives without official intervention. Other suicides may never be discovered because the body is not found;
- incorrect categorisation of cases: eg a coroner may categorise a suicide as misadventure to spare the feelings of relatives;
- suicide statistics are a social construct: they do not represent objective reality or the real rate of suicide, but merely the number of deaths labelled as such by social actors.

**Note:** No marks for an identification that simply says suicide statistics are inaccurate, invalid, unreliable, unrepresentative, etc. without making clear what these terms mean, either by a definition (eg “suicide statistics are invalid, ie do not give a true picture”), or a clarification of the term through the context of the explanation.

- (b) Examine the relationship between crime and deviance and **two or more** of the following areas: families and households; health; mass media; education; wealth, poverty and welfare; work and leisure; power and politics; religion; world sociology. (12 marks)

*This part of the question includes assessment of your understanding of the connections between Crime and Deviance and other substantive topics you have studied.*

**0** No relevant points.

**1 – 4** Answers in this band will show limited knowledge and understanding and will have only limited success in identifying, interpreting, analysing and evaluating material to meet the synoptic requirements of the question.

**Lower in the band**, one or two inconsequential commonsensical points may be made about one of the specified areas, with minimal or no elaboration.

**Higher in the band**, one or two relevant, vaguely sociological, undeveloped points may be made, for instance about lone parent families and crime.

**5 – 9** Answers in this band will show a reasonable knowledge and understanding and will have some success in identifying, interpreting, analysing and evaluating material to meet the synoptic requirements of the question.

**Lower in the band**, answers will identify accurately a limited number of relevant points, eg about anti-school subcultures, and will tend to list descriptively rather than discuss the material presented. Some of the material may not be interpreted appropriately to the demands of the question, eg recounting studies/theories of crime without linking this clearly to any specified areas. Some may deal exclusively (or nearly so) with only one area, not two.

**Higher in the band**, answers will show a greater range of material and will begin to deal with two or more areas (though possibly unevenly), or a greater tendency to discuss rather than list points. Most material will be interpreted in ways appropriate to the question. However, some aspects may not be adequately focused. There will be some limited explicit analysis and/or evaluation, eg by discussing alternative views of deviance in schools.

**10 – 12** Answers in this band will show a sound knowledge and understanding and will be largely successful in identifying, interpreting, analysing and evaluating material to meet the synoptic requirements of the question.

Answers in this band will examine the relationship between crime and deviance and two or more of the specified areas. Material will be appropriately interpreted and applied. Concepts and issues such as the following may feature: deviance amplification; labelling; self-fulfilling prophecy; master status; deviant sub-cultures; anomie; opportunity structures; selective enforcement; social control; relative deprivation; marginalisation; white collar and corporate crime; the underclass etc. Analysis and/or evaluation will be relevant, explicit and well developed, eg by locating the discussion within a broader framework (eg interactionist, feminist, functionalist etc).

- (c) Using material from **Item A** and elsewhere, assess sociological explanations of gender differences in patterns of offending, victimisation and punishment. (40 marks)

*This part of the question includes assessment of your understanding of the connections between Crime and Deviance and sociological theory.*

**AO1: Knowledge and Understanding**

**20 marks**

**0** No relevant knowledge and understanding.

**1 – 5** Answers in this band will show very limited knowledge and understanding and will have only very limited success in meeting the synoptic requirements of the question.

**Lower in the band**, there will be one or two commonsensical points about gender and crime, showing minimal understanding.

**Higher in the band**, there will be one or two isolated, very limited and possibly confused quasi-sociological points, eg about women as victims, possibly with major errors or omissions.

**6 – 10** Answers in this band will show somewhat limited knowledge and understanding and will have somewhat limited success in meeting the synoptic requirements of the question.

**Lower in the band**, there will be shallow and limited knowledge and understanding of some potentially relevant material, eg two or three points about gender differences in recorded crime rates, perhaps with errors.

**Higher in the band**, knowledge will be somewhat greater and more accurate, but still limited, for example to a superficial descriptive account of a study of women and crime.

**11 – 16** Answers in this band will show reasonably good knowledge and understanding and will be reasonably successful in meeting the synoptic requirements of the question.

**Lower in the band**, there will be reasonably accurate knowledge of some theoretical and/or empirical material on gender and crime/deviance.

- some may be broader accounts that amass descriptions of studies (eg of women as offenders, gender differences in law enforcement, etc) but with limited conceptual detail;
- others may be narrower but more conceptually based answers;
- many may focus exclusively on one aspect of the question (eg offending), reflecting a rather partial understanding of the question.

**Higher in the band**, there will be knowledge of both theoretical and empirical material on gender and crime, and slightly more breadth (at least two from offending, victimisation and punishment) or conceptual detail. Material from different perspectives may also feature, reflecting a wider understanding, though there may be more concern with reporting findings of studies from such perspectives than with linking the theoretical and empirical aspects.

**17 – 20** Answers in this band will show very good knowledge and understanding and will successfully meet the synoptic requirements of the question.

These answers will show thorough, conceptually detailed and wide-ranging knowledge and understanding of theoretical and empirical material on gender and offending, victimisation and punishment. Answers will be broad ranging and will show clear understanding of relevant

debates and issues. These may include patriarchy; gender role socialisation; access to illegitimate opportunity structures; control theory; the relationship between class/ethnicity and gender (eg gender and class 'deals'); masculinity and offending; the liberation thesis; the marginalisation thesis; women as victims; differential law enforcement; sentencing policy; the chivalry thesis; official and other sources of data, etc. Varieties of feminism, as well as other perspectives, are likely to feature.

**Higher in the band**, knowledge will be more comprehensive and detailed, and/or links between theoretical and empirical aspects more explicit and developed, and understanding will be clearer and more complex.

In answering this question, candidates may refer to some of the following sources and/or relevant alternative ones: Adler; Box; The British Crime Survey; Campbell; Carlen; AK Cohen; Dobash and Dobash; Farrington and Morris; Graham and Bowling; Heidensohn; Hirschi; Lea and Young; Lyng; Messerschmidt; Pollak; Smart; Walklate.

---

---

## SECTION B: STRATIFICATION AND DIFFERENTIATION

---

**Total for this section: 60 marks**

**2** Read **Item B** and answer parts (a) to (c) which follow.

- (a) Identify and briefly explain **two** ways in which ethnicity is relevant to **one or more** of the following areas: power and politics; religion; world sociology. (8 marks)

*This part of the question includes assessment of your understanding of the connections between Stratification and Differentiation and other substantive topics you have studied.*

Two marks for each of two appropriate ways identified, such as:

- differences in party preferences/allegiances
- different levels of representation among office holders
- likelihood of voting/being registered to vote in elections
- ethnic differences as a source of political conflict
  
- religion as a source of ethnic identity
- appeal of specific religious organisations to specific ethnic groups
- religion as a force integrating ethnic groups into a wider culture
  
- development of ethnic identity as response to colonialism
- ideologies of ethnic superiority justifying imperialism
- impact of globalisation on ethnic identities.

Two further marks for each of these satisfactorily explained, such as:

- likelihood of voting/being registered to vote in elections eg black Americans are less likely than whites to be registered to vote
- religion as a source of ethnic identity: ethnic groups may use religion to reinforce or create a sense of difference or separateness from other groups, or even to define their group membership
- ideologies of ethnic superiority justifying imperialism, eg colonial powers have used ideologies of ethnic or 'racial' superiority to legitimise land seizure, enslavement etc

(b) Examine some of the problems of defining and measuring social class. (12 marks)

*This part of the question includes assessment of your understanding of the connections between Stratification and Differentiation and sociological methods.*

**0** No relevant points.

**1 – 4** Answers in this band will show limited knowledge and understanding and will have only limited success in identifying, interpreting, analysing and evaluating material to meet the synoptic requirements of the question.

**Lower in the band**, one or two inconsequential commonsensical points may be made about class, with minimal or no elaboration.

**Higher in the band**, one or two relevant, vaguely sociological, undeveloped points may be made, for instance about a definition of class.

**5 – 9** Answers in this band will show reasonable knowledge and understanding and will have some success in identifying, interpreting, analysing and evaluating material to meet the synoptic requirements of the question.

**Lower in the band**, answers will identify accurately a limited number of relevant points, eg about the shortcomings of the Registrar-General's classification and/or the office of National Statistics Socio-Economic Classification, and will tend to list descriptively rather than discuss the material presented. Some of the material may not be interpreted appropriately to the demands of the question, eg recounting material on class inequality. Some may deal exclusively (or nearly so) with definition to the exclusion of measurement or vice versa.

**Higher in the band**, answers will show a greater range of material (and begin to deal with both definition and measurement) or greater tendency to discuss rather than list points. Most material will be interpreted in ways appropriate to the question. However, some aspects may not be adequately focused. There will be some limited explicit analysis and/or evaluation, eg by locating discussion within a theoretical framework.

**10 – 12** Answers in this band will show sound knowledge and understanding and will be largely successful in identifying, interpreting, analysing and evaluating material to meet the synoptic requirements of the question.

Answers in this band will examine problems of both definition and measurement of social class. Concepts and issues such as subjective and objective class, problems of conducting censuses, class consciousness, occupation versus property as criteria for class membership, social mobility, the relationship between status or life chances and class, individuals versus households as the unit of analysis, gender and class etc, will be interpreted and applied appropriately to the question. Analysis and/or evaluation will be relevant, explicit and well developed, eg by locating the discussion within a theoretical framework (eg Marxist, Weberian, feminist) or considering relevant methodological issues.

- (c) Using material from **Item B** and elsewhere, assess sociological explanations of gender difference and gender inequality in society. (40 marks)

*This part of the question includes assessment of your understanding of the connections between Stratification and Differentiation and sociological theory.*

**AO1: Knowledge and Understanding**

**20 marks**

**0** No relevant knowledge and understanding.

**1 – 5** Answers in this band will show very limited knowledge and understanding and will have only very limited success in meeting the synoptic requirements of the question.

**Lower in the band**, there will be one or two commonsensical points about gender, showing minimal understanding.

**Higher in the band**, there will be one or two isolated, very limited and possibly confused quasi-sociological points, eg about gender differences, possibly with major errors or omissions.

**6 – 10** Answers in this band will show a somewhat limited knowledge and understanding and will have somewhat limited success in meeting the synoptic requirements of the question.

**Lower in the band**, there will be a shallow and limited knowledge and understanding of some potentially relevant material, eg on one or two aspects of gender role socialisation, perhaps with errors.

**Higher in the band**, knowledge will be somewhat greater and more accurate, but still limited, for example to a superficial descriptive account of a few features of gender inequality in the family, etc.

**11 – 16** Answers in this band will show a reasonably good knowledge and understanding and will be reasonably successful in meeting the synoptic requirements of the question.

**Lower in the band**, there will be a reasonably accurate knowledge of some theoretical and/or empirical material.

- some may be broader accounts that amass descriptions, eg of studies of the position of women in the family, education, work etc, but with limited conceptual detail;
- others may be narrower but more conceptually based answers, eg accounts of varieties of feminist theory.

**Higher in the band**, there will be knowledge of both theoretical and empirical material on gender difference and gender inequality, though probably unequally, and slightly more breadth or conceptual detail. Material from different perspectives may also feature, reflecting a wider understanding, though there may be more concern with reporting findings of studies from such perspectives than with considering their theoretical implications.

**17 – 20** Answers in this band will show a very good knowledge and understanding and will successfully meet the synoptic demands of the question.

These answers will show a thorough, conceptually detailed and wide-ranging knowledge and understanding of theoretical and empirical material on both gender difference and gender inequality, such as the following: radical, Marxist, liberal, black and difference feminism and other theories (eg functionalism, New Right, post-modernism); biology versus culture;

socialisation; social construction of gender; masculinity; inequality in relation to specific institutions (family, labour market, etc); relationship of gender to other forms of stratification; solutions and strategies, cross cultural/historical comparisons, etc. They will show a clear understanding of the theoretical debates surrounding the question.

**Higher in the band**, knowledge will be more comprehensive and detailed, and/or links between theoretical and empirical aspects more explicit and developed, and understanding will become clearer and more complex.

In answering this question, candidates may refer to some of the following sources and/or relevant alternative ones: Barrett & Macintosh, Barron & Norris, Beechey, Benston, Bernard, Dobash & Dobash, Connell, Engels, Firestone, Gilmore, Marx, Millet, Oakley, Ortner, Parsons, Rowbotham, Seidler, Stanko, Walby, Weber, Zaretsky.
