MARK SCHEME for the May/June 2010 question paper

for the guidance of teachers

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

2 marks each to a total of **16** **[16]**
1 mark for correct formula **or** working or **2** for correct answer.

(b) Chikkadea **[2]**

(c) C's gross profit margin shows that she makes more gross profit for every dollar of sales.
C's net profit margin shows that she makes more net profit for every dollar of sales.
C's return on total assets shows that for every dollar's worth of total assets in the business she receives a better return than D does.
C's return on capital employed shows that for every dollar she has invested in the business she receives more profit in return.
C's current ratio shows that she is more able to pay her short term debts.
C's liquid ratio shows that she is more able to pay her immediate debts.
C's debtors' turnover shows that she collects debt faster so that cash becomes available sooner.
C's creditors' turnover shows that she is given longer to pay her debts and has more time to make use of her creditors' cash.
C's inventory return rate (rate of stockturn) shows that she sells her goods faster and should therefore make her profits faster.

Any **four** of the above answers for a maximum of **3** marks each. **[12]**
