UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2011 question paper for the guidance of teachers

9706 ACOUNTING

9706/22

Paper 2 (Structured Questions (Core)), maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

[7]

2 (a) (i)

GROSS PROFIT

		\$000	\$000		
	Opening inventory	28 1			
	Purchases (240 + 100)	<u>340</u>			
	1 1	368			
	Closing inventory	<u>40</u>			
	Cost of goods sold		<u>328</u>	OF1	[4]
(ii)			\$000		
	Sales		480		
	LESS cost of goods sold		<u>328</u>		
	Gross profit		152		
	Less expenses		<u>120</u>	1	
	Profit for the year (net profit)	32	10F	[2]

(b) For (b) award 1 for numerator and 1 for denominator, all own figures From (a) (i) and (ii) OR 2 for correct answer

(i) Mark up =
$$\frac{GP \times 100}{COGS}$$
 = $\frac{152 \times 100}{328}$ = 46.34%
(ii) GP %age = $\frac{GP \times 100}{Turnover}$ = $\frac{152 \times 100}{480}$ = 31.67%
(iii) Exp/sales = $\frac{Exp \times 100}{Turnover}$ = $\frac{120 \times 100}{480}$ = 25%

Page 4	Mark Scheme: Teachers' version				Syllabus	Paper	
	G	CE AS/A LEVEL	. – May/Jι	ıne 2011		9706	22
(iv) NP	%age =	NP×100 Turnover	=	$\frac{32\times100}{480}$	=	6.67%	

(v) ROCE
$$\frac{NP \times 100}{CAP EMP}$$
 = $\frac{32 \times 100}{220}$ = 14.54%

(vi) ROIT =
$$\frac{\text{COGS}}{\text{Average inventory}} = \frac{328}{(40 + 28)/2} = 9.65 \text{ times}$$

(vii) Liquid ratio =
$$\frac{CA - inventory}{CL}$$
 = $\frac{78}{78}$ = 1:1 [14]

(c)			Southern	Northern
	1	Mark-up	40%	46.34%
	2	Gross profit percentage	28.57%	31.67%
	3	Expenses to sales	20%	25%
	4	Net Profit percentage	8.57%	6.67%
	5	Return on capital employed	18.00%	14.54%

One mark each for better or worse (poorer) than - maximum 5 marks

- 1. Northern has a better mark up.
- 2. Consequently a better gross profit percentage.
- 3. Expenses to sales is worse for Northern.
- 4. Net profit percentage for Northern is poorer.
- 5. Northern's ROCE is poorer.

Must be clear that one is better than the other – do not accept higher, lower, greater, lesser, more, less.

Some candidates have treated the comparisons as if they were for the same business over 2 years – do not accept.

One mark each for each valid comment - maximum 5

Sales price is higher – higher mark up.

Administration and advertising costs are higher to sell a higher priced product.

Northern has a better GP percentage but the higher expenses incurred pull down the net profit advantage below Southern and contribute to a poorer ROCE.

The ROCE is poorer because Northern may have more non-current assets employed.

Any valid comment is acceptable provided it justifies the "better or worse" statement. A maximum of 1 mark for each statement and 1 mark for an attached comment. [10]
