## MARK SCHEME for the May/June 2008 question paper

## 9701 CHEMISTRY

9701/02
Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

(ii) at $230^{\circ} \mathrm{C}$

$$
\begin{align*}
K_{\mathrm{c}} & =\frac{\left(1.46 \times 10^{-3}\right)^{2} \times 1.15 \times 10^{-2}}{\left(2.33 \times 10^{-3}\right)^{2}} \\
& =4.5 \times 10^{-3} \mathrm{~mol} \mathrm{dm}^{-3}(1)  \tag{1}\\
K_{\mathrm{c}} & =\frac{\left(7.63 \times 10^{-3}\right)^{2} \times 2.14 \times 10^{-4}}{\left(3.68 \times 10^{-4}\right)^{2}} \\
& =9.2 \times 10^{-2} \mathrm{~mol} \mathrm{dm}^{-3}(1) \tag{1}
\end{align*}
$$

at $465^{\circ} \mathrm{C}$
allow ecf on answer to part (i)
(iii) endothermic because $K_{\mathrm{c}}$ increases with temperature mark is for explanation allow ecf on answer to part (ii) (1)
