

**MARK SCHEME for the May/June 2011 question paper
for the guidance of teachers**

9701 CHEMISTRY

9701/22

Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

- 2 (a) $\text{CH}_2=\text{CH}_2 + \text{HF} \rightarrow \text{CH}_3\text{CH}_2\text{F}$
- | | | | | | | |
|--|-----------------------|-------|------------|-----------------------|-------|------------|
| | bonds | 4 C-H | 1640 | bonds | 5 C-H | 2050 |
| | broken | 1 C=C | 610 | made | 1 C-C | 350 |
| | /kJ mol ⁻¹ | 1 H-F | <u>562</u> | /kJ mol ⁻¹ | 1 C-F | <u>E</u> |
| | | | 2812 | | | (2400 + E) |
- breaking reactant bonds requires
 $4 \times 410 + 610 + 562 = 2812 \text{ kJ mol}^{-1}$ (1)
- making product bonds gives
 $5 \times 410 + 350 + E = (2400 + E) \text{ kJ mol}^{-1}$ (1)
- $\Delta H^\ominus_{\text{reaction}} = - (2400 + E) + 2812 = - 73 \text{ kJ mol}^{-1}$ (1)
- $(2400 + E) = 2812 + 73 = 2885 \text{ kJ mol}^{-1}$
- $E = 2885 - 2400 = 485 \text{ kJ mol}^{-1}$ (1)
- allow ecf on wrong bond energy values and/or incorrect arithmetic [4]
- (b) any **two** from
 non-toxic
