## MARK SCHEME for the October/November 2010 question paper

## for the guidance of teachers

## 9701 CHEMISTRY

9701/22 Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

| Page 2 | Mark Scheme: Teachers' version         | Syllabus | Paper |
|--------|--|----------|-------|
|        | GCE A/AS LEVEL – October/November 2010 | 9701     | 22    |

**1** (a) the actual number of atoms of each element present (1)

in one molecule of a compound (1)

(b) 
$$C_X H_Y + \left(x + \frac{y}{4}\right) O_2 \longrightarrow x CO_2 + \frac{y}{2} H_2 O$$
  
 $x CO_2(1)$   
 $\frac{y}{2} H_2 O(1)$ 
[2]

- (c) (i) oxygen/O<sub>2</sub>(1)
  - (ii) carbon dioxide/CO<sub>2</sub>(1)
  - (iii) 10 cm<sup>3</sup> (1)
  - (iv)  $20 \text{ cm}^3(1)$  [4]

(d) 
$$C_X H_y + (x + \frac{y}{4})O_2 \longrightarrow xCO_2 + \frac{y}{2}H_2O$$
  
10 cm<sup>3</sup> 20 cm<sup>3</sup> 10 cm<sup>3</sup>

1 mol of  $C_x H_y$  gives 1 mol of  $CO_2$ 

whence 
$$x = 1$$
 (1)

1 mol of  $C_x H_y$  reacts with 2 mol of  $O_2$ 

whence 
$$\left(x + \frac{y}{4}\right) = 2$$

and y = 4(1)

molecular formula is  $CH_4(1)$
