#### UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

**International General Certificate of Secondary Education** 

### MARK SCHEME for the October/November 2007 question paper

### 0610 BIOLOGY

0610/02

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2007 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

#### **General notes**

Symbols used in mark scheme and guidance notes

/ separates alternatives for a marking point

; separates points for the award of a mark

MP in guidance refers to numbered mark point

ORA or reverse argument/reasoning

OWTTE or words to that effect

R reject

I ignore/irrelevant

#### 5 (a) (i)

(ii) consumer

Any two animals in web;

carnivore

Any two from – carnivorous insect, spider, fox, toad, lizard, stoat, kestrel;

he<u>rbivore</u>

Any two – from herbivorous insect, vole, rabbit;

Each correct column - 1 mark

[3]

[1]

- **(b)** \* 1 stoat population could rise;
  - 2 as kestrels eat less voles:
  - 3 more food/voles for stoats;
  - \* 4 (if more stoats then) population of rabbits fall;
    - 5 as stoats eat more of them;
    - 6 more voles would eat more grass;
    - 7 less food for rabbits (population falls);

Any four – 1 mark each

[4]

(c) (i) 1 foxes/kestrel/top carnivore;

[1]

- 2 plants absorb radioactive minerals/ions/chemicals;
- 3 taken in by herbivores within plants/on plants;
- 4 passed to carnivore;
- 5 at each stage predator eats lots of prey individuals;
- 6 (bio)accumulation occurs;

Any two – 1 mark each

[2]

[1]

(ii) bones and teeth/where there are high levels of calcium;

# [Total: 12]

#### <u>Guidance</u>

**(b)** 1 mark for each of two predictions (\*).

1 mark for each of two suitable explanatory points.

Page 6	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2007	0610	02

6 (a) A – epidermis/epidermal cell; B – cuticle; [2]

(b) (i) diffusion; [1]

(ii) a stoma correctly labelled; [1]

(iii) movement of gas or vapour reason for movement out of leaf into leaf none of gas or vapour carbon dioxide T for use in photosynthesis/OWTTE; oxygen T product of photosynthesis/OWTTE; water vapour Т transpiration/OWTTE;

Each correct row – 1 mark each [3]

(iii) slow down/stop leaving leaf; [1]

**(c)** xylem position identified by label; correctly named;

[Total 10]

[2]

#### Guidance

- (b) (ii) Accept label line to guard cell or pore.
- (b) (iii) MP 1 and 2 if reason is that diffusion occurs in both directions at the same time then give credit for T in both in and out columns.
  Ψ = blank.
- 7 (a) 1 yeast;
  - 2 ferments;
  - 3 sugars/glucose;
  - 4 anaerobically/in absence of oxygen;
  - 5 forms alcohol/ethanol;

Any three – 1 mark each

[3]

- (b) 1 slows nerve impulses;
  - 2 impairs judgment;
  - 3 reduces inhibitions/is a depressant;
  - 4 is addictive:
  - 5 damages/kills brain cells;
  - 6 causes cirrhosis of liver/damages/kills liver cells;
  - 7 can cause stomach ulcers;
  - 8 may increase risk of certain cancers;

Any three – 1 mark each

[Total: 6]

[3]

#### **Guidance**

- (a) If equation, word or symbol, given credit for MP 3 and 5 only. No credit for ref. to carbon dioxide.
- **(b)** MP8 R wrongly named cancer.
