## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

**International General Certificate of Secondary Education** 

## MARK SCHEME for the May/June 2010 question paper for the guidance of teachers

## 0620 CHEMISTRY

0620/52

Paper 52 (Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	IGCSE – May/June 2010	0620	52

## 1 Table of results

average

total volume of water boxes correctly completed (1) temperature boxes completed (1) values decreasing (1) comparable to supervisor's results (2) ±10 at 10 cm<sup>3</sup> ±10 at 16 cm<sup>3</sup> [5] (a) appropriate scale for y axis (1) points plotted correctly(4), -1 for each incorrect best fit straight line graph (1) [6] (b) clear liquid formed/no solid visible owtte (1) e.g. no salt left [1] (c) value from graph for  $9 \text{ cm}^3$  of water (1)  $\pm \frac{1}{2}$  small square extrapolation of straight line shown (1) [2] (d) sketch graph below line (1) [2] label (1) **(e)** temperatures at which crystals appear lower (1) solution more dilute in same volume of water/less saturated owtte (1) [2] temperature halved as half as much solid = 2 (f) one improvement from e.g. don't use a beaker of cold water to cool solution/ do not remove thermometer from the solution/ use second person/or IT method to note formation of crystals repeat linked explanation different rate of heat losses/ loss of solid on thermometer/ observing formation of first crystals may vary

Page 3		Mark Scheme: Teachers' version	Syllabus	Paper	
		IGCSE – May/June 2010	0620	52	
(a)	Tests on solid W				
	yellow (1 precipitat	te (1) not solid		[2]	
(b)	) Tests on solution X				
	(i) blue pH c	e (1) of solution X approx 1–4 (1)		[1] [1]	
	(ii) blue prec	e (1) sipitate (1)		[2]	
	dark	precipitate (1) er/deep/royal blue (1) tion (1) or precipitate dissolves/goes clear		[3]	
	crea	vn (liquid/solution) (1) nm/white (1) d/precipitate (1)		[3]	
(c)	Tests on	solution Y			
	(i) pH 1	1–3 (1)		[1]	
	(ii) white prec	e (1) cipitate (1)		[2]	
(d)	iodide or	· I <sup>-</sup> (1) not iodine		[1]	
	copper (′ acidic (1)			[2]	
	sulfate or acid only sulfuric a			[2]
