0653/02

May/June 2009

1 hour 15 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs, tables or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer **all** questions.

A copy of the Periodic Table is printed on page 24.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

Total	

This document consists of **21** printed pages and **3** blank pages.

- 1 Fig. 1.1 shows a section through a tooth.

Fig. 1.1

- (a) Name parts **A**, **B** and **C**.

A

B

C

[3]

- (b) Explain how teeth help with digestion.

.....

.....

..... [2]

- (c) Name **one** mineral and **one** vitamin that are essential for the growth of strong teeth and bones.

mineral

vitamin

[2]

- 2 (a) A student investigated how a change in potential difference across a lamp affected the current flowing through it.

For
Examiner's
Use

She used wires to connect the components shown in Fig. 2.1 to make a circuit.

Fig. 2.1

- (i) Using the correct symbols from Fig. 2.1, draw a diagram to show the circuit she used.

[3]

- (ii) Explain why the variable resistor is included in the circuit.

.....
..... [1]

(iii) Her results are shown in Table 2.1.

Table 2.1

potential difference across lamp / V	current through lamp / A	resistance of lamp filament / Ω
4	1.2	3.3
8	1.5	
12	1.7	7.1

Complete the table by calculating the missing resistance and writing your answer in the empty box.

State the formula that you use and show your working.

formula

working

For
Examiner's
Use

[2]

(b) Electricity can kill.

Identify and explain the electrical hazard shown in Fig. 2.2.

Fig. 2.2

.....

.....

.....

..... [2]

For
Examiner's
Use

- 3 (a) The names of six elements are shown below.

carbon chlorine cobalt neon silicon sodium

For
Examiner's
Use

Choose the element from the list

which is the least reactive,

.....

which is used to sterilise drinking water,

.....

which is a metal that forms coloured compounds.

..... [3]

- (b) Fig. 3.1 shows a diagram of an atom.

Fig. 3.1

- (i) State the nucleon number (mass number) of the atom shown in Fig. 3.1.

..... [1]

- (ii) State the name of the element made of atoms like the one in Fig. 3.1.

Explain your answer briefly.

element

explanation

..... [2]

(c) Fig. 3.2 shows a test for a gas which is produced when a solid element **A** reacts in a solution **B**.

For
Examiner's
Use

Fig. 3.2

Name the gas produced in this reaction, and suggest the names of element **A** and solution **B**.

gas

element **A**

solution **B**

[3]

4 Fig. 4.1 shows an arum lily.

Arum lilies have flowers that are pollinated by insects.

There are many tiny flowers on a stalk, inside a large white structure called a spathe.

Fig. 4.1

(a) (i) Name the part of the flower in which pollen is made.

..... [1]

(ii) What does a pollen grain contain?

..... [1]

(iii) Explain the meaning of the term *pollination*.

.....

 [2]

- (b) Arum lilies produce heat energy to raise the temperature of the flowers. This helps to attract insects to the flowers. They use respiration to do this.

For
Examiner's
Use

A researcher investigated whether there was a relationship between the temperature of the flowers inside an arum lily spathe and the rate of oxygen use.

He took 15 arum lilies, and measured the temperature and rate of oxygen use for each one.

Fig. 4.2 shows his results.

Fig. 4.2

- (i) Describe the relationship between the temperature inside the spathe and the rate of oxygen use by the arum lily.

.....
 [1]

- (ii) Explain the reasons for the relationship you have described.

.....

 [2]

- (c) The fuel that the arum lilies use to produce the heat energy is glucose.

Describe how the lilies obtain a supply of glucose.

.....

.....

..... [2]

- (d) The leaves of arum lilies contain palisade cells, which are typical plant cells containing chloroplasts.

Complete the diagram of a palisade cell. Include these structures in your labels.

cell membrane

cell wall

chloroplast

cytoplasm

nucleus

vacuole

[4]

*For
Examiner's
Use*

BLANK PAGE

Please turn over for Question 5.

- 5 The Vikings, who lived in Scandinavia about 1200 years ago, sailed in boats called longships across the sea to Britain.

For
Examiner's
Use

- (a) (i) They travelled 900 km in 150 hours.

Calculate their average speed for this journey.

State the formula that you use and show your working.

formula

working

..... km/h [2]

- (ii) At one stage on their journey they were travelling at 7.2 km/h.

Calculate their speed in m/s.

Show your working.

..... m/s [1]

- (b) A longship was moving at constant speed. The diagram shows four forces acting on it.

Name **two** forces which must be equal in size.

..... [1]

- (c) The Vikings used animal furs to make clothes to keep them warm.

Explain in terms of conduction and convection how fur clothes would have kept the Vikings warm.

.....

.....

.....

..... [3]

- (d) The volume of the wood used to construct the longship was 9 m^3 .

If the density of the wood was 800 kg/m^3 , calculate the mass of the wood used.

State the formula that you use and show your working.

formula

working

..... kg [2]

- (e) The major energy source used to propel the longship was the wind. Wind is a renewable energy source.

- (i) Name **one** other renewable energy source.

..... [1]

- (ii) Name **one** non-renewable energy source.

..... [1]

- 6 (a) Fig. 6.1 shows industrial apparatus used for the fractional distillation of petroleum (crude oil).

For
Examiner's
Use

Fig. 6.1

Draw lines on Fig. 6.1 connecting the fractions, **P**, **Q**, **R** and **S** to the correct boiling point range. The line for fraction **Q** has been drawn for you. [2]

- (b) Plastics and steel are both used to make buckets.

bucket

Fig. 6.2

- (i) Suggest **one** reason why plastics are suitable materials from which to make buckets.

.....

..... [1]

- (ii) Buckets made from steel must be protected from rusting.

Name the element and the compound which react with mild steel to form rust.

element

compound

[2]

- (iii) Describe briefly **one** suitable method of protecting a steel bucket from rusting.

.....

.....

[1]

- (iv) Name the element which is oxidised when rust forms.

.....

[1]

- (v) Name the alloy from which cutlery is made.

cutlery

Fig. 6.3

.....

[1]

7 Read the following description of a food web.

For
Examiner's
Use

- Ants collect leaves from trees and take them into their nests.
- A fungus grows on the leaves and breaks them down.
- The ants eat the leaves, and also the fungus.
- Small birds eat the ants, and hawks eat the small birds.
- Pangolins eat only ants.

a pangolin

Fig. 7.1

(a) In the space below, complete a food web that includes all of the organisms described in Fig. 7.1.

[3]

(b) (i) Name the producer in this food web.

..... [1]

(ii) Name a decomposer in this food web.

..... [1]

(c) Pangolins are becoming rare in some parts of the world.

Use the information in Fig. 7.1, and your own knowledge, to explain why it is important to prevent deforestation if we want to conserve pangolins.

.....
.....
.....
..... [2]

*For
Examiner's
Use*

- 8 (a) A hotel has a lift (elevator). It moves through a vertical height of 3 m between each floor.

For
Examiner's
Use

Fig. 8.1

- (i) A passenger travels in the lift. The passenger has a mass of 80 kg and weighs 800 N. The mass of the empty lift is 1200 kg.

Calculate the total weight of the passenger and lift.

Show your working.

..... N [2]

- (ii) Calculate the work done when the lift and passenger move up three floors, from Floor 1 to Floor 4.

State the formula that you use and show your working.

formula

working

..... J [2]

- (b) (i)** In the restaurant, music is being played through loudspeakers.

Explain how the sound coming from the loudspeakers reaches the people in the restaurant.

.....
.....
..... [2]

- (ii)** The amplitude of the sound waves is increased.

What effect will this have on the sounds heard by the people in the restaurant?

..... [1]

*For
Examiner's
Use*

- 9 Fig. 9.1 shows the main steps in a method used by a student to make salts.

In separate experiments the student reacted the carbonate of a metal and the oxide of a metal with dilute sulfuric acid.

For
Examiner's
Use

Fig. 9.1

- (a) Name processes **A** and **B** shown in Fig. 9.1.

process **A**

process **B**

[2]

- (b) Suggest and explain why the student used **powdered** solids in the reactions with dilute sulfuric acid.

.....

 [2]

- (c) (i) Name the salt which is produced when zinc oxide reacts with dilute sulfuric acid.

..... [1]

- (ii) Complete the word equation for the reaction of copper carbonate with sulfuric acid.

- (d) (i) The salt calcium chloride is made when calcium oxide reacts with hydrochloric acid. The symbolic equation for this reaction is shown below.

Explain whether or not this equation is balanced.

.....

 [2]

- (ii) A student reacted calcium oxide with hydrochloric acid using the apparatus shown in Fig. 9.2.

Fig. 9.2

The student noticed that the temperature of the mixture increased.

Explain this observation.

.....
 [1]

The volume of one mole of any gas is 24 dm^3 at room temperature and pressure (r.t.p.).

University of Cambridge International Examinations is part of the Cambridge Assessment Group. Cambridge Assessment is the brand name of University of Cambridge Local Examinations Syndicate (UCLES), which is itself a department of the University of Cambridge.
