## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

**International General Certificate of Secondary Education** 

## MARK SCHEME for the May/June 2011 question paper for the guidance of teachers

## 0680 ENVIRONMENTAL MANAGEMENT

0680/41

Paper 4 (Alternative to Coursework), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

•		IGCSE – May/June 2011	0680	41	
(a) (i)	loss of plant cover; roots pulled out; no roots to hold soil; loss of interception; erosion by wind; by rain; loss of minerals/nutrients/fertility; difficult for plants to regenerate; [3]				
(ii)	same conditions; similar pastures/similar farms; same soil type; soil pH; same climate; same rainfall; [2]				
(iii)	fair t	test/comparison idea		[1]	
(iv)	age	of sheep/ size/type of pasture/farm/ AVP;		[max 1]	
(v)	Sardi, more milk; and lambs; OR Timahdit, more meat; more wool; (max one if both types discussed)				
(b) (i)	lamb	os 20(%); ewes 30(%);		[2]	
(ii)	extra fed;	a feed in the dry season/eq so more growth/milk p	production/less di	sease as better [1]	
(iii)	only	need to plant it once/ it is self seeding/ no need to p	olough;	[1]	
(c) (i)	242;	;		[1]	
(ii)	dries	st July; AND wettest March;		[1]	
(iii)	drought causes a big decline in Medicago yield/not much difference between weedy and Medicago/eq; (allow Medicago still does better in drought years) [1]				
(iv)	repe	eat the trial/eq;		[1]	
(d) (i)	plan	A sheep might starve/overgrazing/eq;		[1]	
(ii)	-	<b>B</b> more food for sheep/eq; so survive drought; in rell/eq	on drought more	sheep products [2]	
(iii)	<b>plan C</b> more cash crops/income; not as reliant on one crop/more variety of crops; any disease would do less damage to yield/income; ref to crop rotation; ref to (beans)improved fertility/manures/sheep dung; [max 2]				
(e) (i)	sugg	scription of) some crop rotation; intercropping; p gest a specific cash crop; use of sheep manure; rot r two; and three; AVP; such as ref to leguminous pla	ational grazing; r		
(ii)	out/p	fertility – organic matter not washed away/combine prevents/reduces leaching; erosion – less surface runoff; so less soil washed a

rage 3		IGCSE – May/June 2011	0680	41				
(a) (i)	nhos		0000	[1]				
	•							
(ii)	99 n	nillion (US\$);		[1]				
(b) (i)	mos	most harmful minerals: lead; cobalt;						
	reasons: both have 4 health risks/; least harmful mineral zinc as only one health ris lead has risk of blood poisoning; cobalt has risk of skin irritation; [max							
(ii)	draw arrows pointing right;							
(iii)	lowest: algae highest: large fish; Algae short lived; only absorbs from water/eq; fish long lived; metal not excreted; bioaccumulates/stored in body; [max 3]							
(c) (i)	5(tim	nes more);		[1]				
(ii)	5 x 1	100 x 1 = 500 (m <sup>3</sup> )		[1]				
(iii)	added value; control of market; more employment; reduced transport costs; increase agricultural output; improved infrastructure; [max							
(iv)	orier	ntation; labels on axes (units on at least one axis);; p	olots (no errors);	[4]				
(v)		ease in growth/eq; dy/no further increase/eq;		[2]				
(vi)	18kg	g, as no further increase in yield/eq;		[1]				
(a) uses waste from coal burning; for 30 years; no need to transport tonnes of waste/low transport costs; reduce need for waste storage; export gives Govt money for infrastructure/eq; [max 2]								
	(b) carbon dioxide released; leads to greenhouse effect/described/global warming; sulphur dioxide released; acid rain; [max 2]							
(c) no need to import coal; energy source is free; will never run out/sustainable/renewable/eq; ref to energy security; pollution free/eq; [max 2]								
do sola car cou so v will	idea of no further building of coal fired power stations/use alternative energy sources; do not want to convert to oil/gas for electricity generation; solar power can be carried out in desert/unproductive land; can invest in solar slowly as demand increases; could sell surplus electricity to nearby countries; so workers experienced/trained; will need help from firms outside Morocco to start with; AVP; such as desert sparsely populated/eq [max 4]
