CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2013 series

0680 ENVIRONMENTAL MANAGEMENT

0680/12 Paper 1, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	Page	2	Mark Scheme IGCSE – October/November 2013	Syllabus 0680	Paper 12
1	(a) (i)	lowe	est shale band;	0000	[1]
	(ii)	sedi	mentary		[1]
	(iii)	build desc san build sha		ulfurisation/glass/b	
			men/oil bearing;		[1]
	(iv)	heat	y) limestone; ting; (high) pressure;		[2]
	(b) (i)	pres	m) dead plants/eq; ssure/time;		[2]
	(ii)	oil w gas rene	coal is used in 2005; vas less than coal, now more; is more, but still less than coal; ewables much more, but much less than coal; dit one for any calculation to illustrate a point)		[2]
	(iii)	coal	of renewables; stocks depleted/owtte; ries about pollution/ named problem (e.g. greenhous	se effect);	[1] [Total: 10]
2	(a) (i)		et correctly plotted AND key; kis labelled yield AND kg per hectare (IGNORE x la	bel);	[2]
	(ii)		at; 7 (kg hectare)/ %;		[1]
	irr us	proveous igation se of pe	d varieties/(A) GM;;		[3]
	pe lo:	fertilisesticidess of fi	sers; es dangerous; sh/frogs;		
			of chemicals; t of purchasing e.g. fertiliser/pesticides (once).		[4]
					[Total: 10]

3	(a)	(i)	loss of vegetation/forest, allows more water to drain off; slope angle steeper increases runoff (whether vegetated or not), but less on forest slopes; rainfall intensity increases runoff and thus erosion risk, very much more on ba				
			ground than on forested;	[3]			
		(ii)	plough perpendicular to slope/along contours (to form ruts); which slows water runoff; traps water; thus slowing soil erosion downhill;	[3]			
	(b)	(i)	mostly large farms; calculation or data quoted to support (e.g. 46% over 1000 hectares); few small farms; figures again (e.g. only 1% below 10 hectares)/none less than 2 hectares;	[2]			
		(ii)	most people who farm small farms are not owners but pay rent; cannot afford/are not willing to implement soil conservation measures; large farms owned by richer; thus more likely;	[2]			
				[Total: 10]			
 4 (a) phytoplankton; sea birds/cormorant/humans/sharks/tuna anchovy; tuna/anchovy; (b) less phytoplankton; fewer zooplankton and anchovy (small fish); reduced catches of large fish/sharks; reduction in seabirds; 		sea	birds/cormorant/humans/sharks/tuna anchovy;	[3]			
		few red	rer zooplankton and anchovy (small fish); uced catches of large fish/sharks;	[3]			
	(c)	zooplankton: numbers will rise because; not eaten by anchovy;					
			seabirds: numbers will fall/they (die/migrate);				
	as less food in form of anchovy;			[4]			
				[Total: 10]
