Location Entry Codes

As part of CIE's continual commitment to maintaining best practice in assessment, CIE uses different variants of some question papers for our most popular assessments with large and widespread candidature. The question papers are closely related and the relationships between them have been thoroughly established using our assessment expertise. All versions of the paper give assessment of equal standard.

The content assessed by the examination papers and the type of questions is unchanged.

This change means that for this component there are now two variant Question Papers, Mark Schemes and Principal Examiner's Reports where previously there was only one. For any individual country, it is intended that only one variant is used. This document contains both variants which will give all Centres access to even more past examination material than is usually the case.

The diagram shows the relationship between the Question Papers, Mark Schemes and Principal Examiners' Reports that are available.

| Question Paper | Mark Scheme | Principal Examiner's Report |
|----------------------------------|-------------------------------|--------------------------------------------|
| Introduction | Introduction | Introduction |
| First variant Question Paper | First variant Mark Scheme | First variant Principal Examiner's Report |
| Second variant Question Paper | Second variant Mark Scheme | Second variant Principal Examiner's Report |

Who can I contact for further information on these changes?

Please direct any questions about this to CIE's Customer Services team at: international@cie.org.uk

The titles for the variant items should correspond with the table above, so that at the top of the first page of the relevant part of the document and on the header, it has the words:

• First variant Question Paper / Mark Scheme / Principal Examiner's Report

or

Second variant Question Paper / Mark Scheme / Principal Examiner's Report

as appropriate.

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

| CANDIDATE NAME | | | |

| Candidates answer or | the Question Paper. | | |
| Additional Materials: | Electronic calculator | Geometrical instruments | |

Tracing paper (optional)

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Mathematical tables (optional)

Write in dark blue or black pen.

You may use a soft pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

If working is needed for any question it must be shown below that question.

Electronic calculators should be used.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total of the marks for this paper is 70.

Answer _____[3]

14 Sitora has two plants in her school classroom.

Plant A needs a lot of light and must not be more than 2.5 metres from the window. Plant B needs very little light and must be further from the window than from the door. For each plant, draw accurately the boundary of the region in which it can be placed. In the diagram, 1 centimetre represents 1 metre.

For Examiner's Use

ABCD, BEFC and AEFD are all rectangles. ABCD is horizontal, BEFC is vertical and AEFD represents a hillside. AF is a path on the hillside. $AD = 800 \,\text{m}$, $DC = 600 \,\text{m}$ and $CF = 200 \,\text{m}$.

(a) Calculate the angle that the path AF makes with ABCD.

Answer(a) [5]

(b) In the diagram *D* is due south of *C*.

Jasmine walks down the path from *F* to *A* in bad weather. She cannot see the path ahead. The compass bearing she must use is the bearing of *A* from *C*.

Calculate this bearing.

Answer(b) [3]
