## INTRODUCTION

Cambridge International Mathematics (IGCSE) syllabus is designed as a two-year course for examination at age 16-plus.

The main sections are:
Aims
Assessment Objectives
Assessment
Curriculum Content.

## AIMS

The Aims of this syllabus should enable students to:

1. acquire a foundation of mathematical skills appropriate to further study and continued learning in mathematics;
2. develop a foundation of mathematical skills and apply them to other subjects and to the real world;
3. develop methods of problem solving;
4. interpret mathematical results and understand their significance;
5. develop patience and persistence in solving problems;
6. develop a positive attitude towards mathematics which encourages enjoyment, fosters confidence and promotes enquiry and further learning;
7. appreciate the beauty and power of mathematics;
8. appreciate the difference between mathematical proof and pattern spotting;
9. appreciate the interdependence of different branches of mathematics and the links with other disciplines;
10. appreciate the international aspect of mathematics, its cultural and historical significance and its role in the real world;
11. read mathematics and communicate the subject in a variety of ways.

## ASSESSMENT OBJECTIVES

The examination will test the ability of candidates to:

1. know and apply concepts from all the aspects of mathematics listed in the specification;
2. apply combinations of mathematical skills and techniques to solve a problem;
3. solve a problem by investigation, analysis, the use of deductive skills and the application of an appropriate strategy;
4. recognise patterns and structures and so form generalisations;
5. draw logical conclusions from information and understand the significance of mathematical or statistical results;
6. use spatial relationships in solving problems;
7. use the concepts of mathematical modelling to describe a real-life situation and draw conclusions;
8. organise, interpret and present information in written, tabular, graphical and diagrammatic forms;
9. use statistical techniques to explore relationships in the real world;
10. communicate mathematical work using the correct mathematical notation and terminology, logical argument, diagrams and graphs;
11. make effective use of technology;
12. estimate and work to appropriate degrees of accuracy.

## GRAPHICS CALCULATOR REQUIREMENTS

Students should be able to do the following using a graphics calculator.

1. Sketch a graph.
2. Produce a table of values for a function.
3. Find zeros and local maxima or minima of a function.
4. Find the intersection point of two graphs.
5. Find mean, median, quartiles.
6. Find the linear regression equation.

Other existing in-built applications should not be used and will gain no credit.
Calculators with symbolic algebraic logic are not permitted.
Any other applications and programs from external sources are not permitted.

## FORMULA LIST

There will be a list of formulae appropriate to the Core tier at the start of Papers 1 and 3 . There will be a corresponding list of formulae appropriate to the Extended tier at the start of Papers 2 and 4. The Papers may require the use of none, some or all of the formulae listed. The formula lists are given in the Appendix of this booklet.

## ASSESSMENT

## Core

There are three written papers with a total of $31 / 2$ hours.
Candidates should attempt to answer all the questions on each paper.

## Paper 1 Time 45 minutes 40 marks 25\%

10-12 short response questions.
No calculators are permitted on this paper.
This paper is designed to assess knowledge and use of basic skills and methods. While any part of the syllabus content may be assessed in this paper, questions will focus on concepts which can be assessed without access to a calculator.
Paper 3 Time 1 hour 45 minutes 96 marks 60\%

11-15 medium to extended response questions.
A graphics calculator is required for this paper.
Any area of the syllabus may be assessed.
Some of the questions will particularly assess the use of the graphics calculator functions described on page 2.

Paper 5 Time 1 hour 24 marks 15\%
One investigation question.
A graphics calculator is required for this paper.
Candidates will be assessed on their ability to investigate and solve a more open-ended problem. Clear communication and full reasoning will be especially important and mark schemes will reflect this.
An extended time allowance is given for this paper to allow students to explore and communicate their ideas fully.

## Extended

There are three written papers with a total of $41 / 2$ hours.
Candidates should attempt to answer all the questions on each paper.
Paper 2 Time 45 minutes 40 marks 20\%

10-12 short response questions.
No calculators are permitted on this paper.
This paper is designed to assess knowledge and use of basic skills and methods. While any part of the syllabus content may be assessed in this paper, questions will focus on concepts which can be assessed without access to a calculator.

Paper 4 Time 2 hours 15 minutes 120 marks 60\%
11-15 medium to extended response questions.
A graphics calculator is required for this paper.
Any area of the syllabus may be assessed.
Some of the questions will particularly assess the use of the graphics calculator functions described on page 2.

Paper 6 Time 1 hour 30 minutes 40 marks 20\%
One investigation and one modelling question.
A graphics calculator is required for this paper.
Candidates will be assessed on their ability to investigate, model, and solve more open-ended problems. Clear communication and full reasoning will be especially important and mark schemes will reflect this.
An extended time allowance is given for this paper to allow students to explore and communicate their ideas fully.

## CURRICULUM CONTENT (Core)

|  | ITEM | Notes | Link <br> within <br> syllabus |
| :--- | :--- | :--- | :--- |
| $\mathbf{1}$ | NUMBER |  |  |
| 1.1 | Vocabulary and notation for different sets of numbers: <br> natural numbers $\mathbb{N}$, primes, squares, cubes, integers $\mathbb{Z}$, <br> rational numbers $\mathbb{Q}$, irrational numbers, real numbers $\mathbb{R}$ | $\mathbb{N}=\{0,1,2, \ldots\}$ |  |
| 1.2 | Use of the four operations and brackets |  |  |
| 1.3 | Highest common factor, lowest common multiple |  |  |
| 1.4 | Calculation of powers and roots |  | 4.5 |
| 1.5 | Ratio and proportion |  |  |
| 1.6 |  |  |  |
| 1.7 | Equivalences between decimals, fractions, ratios and <br> percentages |  |  |
| 1.8 | Percentages including applications such as interest and profit | Excluding reverse percentages |  |
| 1.9 | Meaning of exponents (powers, indices) in $\mathbb{Z}$ <br> Standard Form $a \times 10^{n}$ where $1 \leqslant a<10$ and $n \in \mathbb{Z}$ <br> Rules for exponents |  |  |
| 1.10 |  | 1 year $=365$ days |  |
| 1.11 | Estimating, rounding, decimal places and significant figures |  |  |
| 1.12 | Calculations involving time: second (s), minutes (min), <br> hours (h), days, months, years including the relation between <br> consecutive units |  |  |
| 1.13 | Speed, distance, time problems |  |  |
|  |  |  |  |

## CURRICULUM CONTENT (Extended)

(A denotes 'Assumed Knowledge' and will not be assessed directly at the Extended Level.)

|  | ITEM | Notes | Link within syllabus |  |
| :---: | :---: | :---: | :---: | :---: |
| 1 | NUMBER |  |  |  |
| 1.1 | Vocabulary and notation for different sets of numbers: natural numbers $\mathbb{N}$, primes, squares, cubes, integers $\mathbb{Z}$, rational numbers $\mathbb{Q}$, irrational numbers, real numbers $\mathbb{R}$ | $\mathbb{N}=\{0,1,2, \ldots\}$ |  | A |
| 1.2 | Use of the four operations and brackets |  |  | A |
| 1.3 | Highest common factor, lowest common multiple |  |  | A |
| 1.4 | Calculation of powers and roots |  |  | A |
| 1.5 | Ratio and proportion |  | 4.5 | A |
| 1.6 | Absolute value $\|x\|$ |  |  |  |
| 1.7 | Equivalences between decimals, fractions, ratios and percentages |  |  | A |
| 1.8 | Percentages including applications such as interest and profit |  | 11.7 |  |
| 1.9 | Meaning of exponents (powers, indices) in $\mathbb{Q}$ Standard Form $a \times 10^{n}$ where $1 \leqslant a<10$ and $n \in \mathbb{Z}$ Rules for exponents |  |  |  |
| 1.10 | Surds (radicals), simplification of square root expressions Rationalisation of the denominator | e.g. $\frac{1}{\sqrt{3}-1}$ |  |  |
| 1.11 | Estimating, rounding, decimal places and significant figures |  |  | A |
| 1.12 | Calculations involving time: second (s), minutes (min), hours ( h ), days, months, years including the relation between consecutive units | 1 year $=365$ days |  | A |
| 1.13 | Speed, distance, time problems |  |  |  |

## CURRICULUM CONTENT (Core) continued

| 2 | ALGEBRA |  |  |
| :---: | :---: | :---: | :---: |
| 2.1 | Writing, showing and interpretation of inequalities, including those on the real number line |  | 9.2 |
| 2.2 | Solution of simple linear inequalities |  |  |
| 2.3 | Solution of linear equations |  |  |
| 2.4 | Simple indices - multiplying and dividing | e.g. $8 x^{5} \div 2 x^{3}$ |  |
| 2.5 | Derivation, rearrangement and evaluation of simple formulae |  |  |
| 2.6 | Solution of simultaneous linear equations in two variables |  |  |
| 2.7 | Expansion of brackets |  |  |
| 2.8 | Factorisation: common factor only | e.g. $6 x^{2}+9 x=3 x(2 x+3)$ |  |
| 2.9 | Algebraic fractions: <br> simplification <br> addition or subtraction of fractions with integer denominators multiplication or division of two simple fractions | e.g. $\frac{2 x^{2}}{6 x}$ <br> e.g. $\frac{2 x}{3}-\frac{y}{5}$ <br> e.g. $\frac{p}{q} \div \frac{2 t}{3 q}$ |  |
| 2.10 |  |  |  |
| 2.11 | Use of a graphics calculator to solve equations, including those which may be unfamiliar | e.g. $2^{x}=x^{2}$ | 3.6 |
| 2.12 | Continuation of a sequence of numbers or patterns <br> Determination of the $n$th term <br> Use of a difference method to find the formula for a linear sequence or a simple quadratic sequence |  |  |
| 2.13 |  |  |  |

## CURRICULUM CONTENT (Extended) continued

| 2 | ALGEBRA |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 2.1 | Writing, showing and interpretation of inequalities, including those on the real number line |  | 9.2 | A |
| 2.2 | Solution of linear inequalities <br> Solution of inequalities using a graphics calculator |  |  |  |
| 2.3 | Solution of linear equations including those with fractional expressions |  |  |  |
| 2.4 | Indices |  |  |  |
| 2.5 | Derivation, rearrangement and evaluation of formulae |  |  |  |
| 2.6 | Solution of simultaneous linear equations in two variables |  |  |  |
| 2.7 | Expansion of brackets, including the square of a binomial |  |  |  |
| 2.8 | Factorisation: common factor difference of squares trinomial four term | $\begin{aligned} & 6 x^{2}+9 x=3 x(2 x+3) \\ & 9 x^{2}-16 y^{2}=(3 x-4 y)(3 x+4 y) \\ & 6 x^{2}+11 x-10=(3 x-2)(2 x+5) \\ & x y-3 x+2 y-6=(x+2)(y-3) \end{aligned}$ |  |  |
| 2.9 | Algebraic fractions: <br> simplification, including use of factorisation addition or subtraction of fractions with linear denominators <br> multiplication or division and simplification of two fractions |  |  |  |
| 2.10 | Solution of quadratic equations: by factorisation using a graphics calculator using the quadratic formula | formula given | 3.6 |  |
| 2.11 | Use of a graphics calculator to solve equations, including those which may be unfamiliar | e.g. $2^{x}-1=1 / x^{3}$ | 3.6 |  |
| 2.12 | Continuation of a sequence of numbers or patterns Determination of the $n$th term <br> Use of a difference method to find the formula for a linear sequence, a quadratic sequence or a cubic sequence <br> Identification of a simple geometric sequence and determination of its formula |  |  |  |
| 2.13 | Direct variation $y \propto x, y \propto x^{2}, y \propto x^{3}, y \propto \sqrt{x}$ Inverse variation $y \propto 1 / x, y \propto 1 / x^{2}, y \propto 1 / \sqrt{x}$ Best variation model for given data |  | modelling |  |

## CURRICULUM CONTENT (Core) continued

## CURRICULUM CONTENT (Extended) continued

| 3 | FUNCTIONS |  |  |
| :---: | :---: | :---: | :---: |
| 3.1 | Domain and range <br> Mapping diagrams | domain is $\mathbb{R}$ unless stated otherwise |  |
| 3.2 | Recognition of the following function types from the shape of their graphs: <br> $f(x)=a x^{2}+b x+c$ <br> cubic <br> $f(x)=a / x$ <br> exponential $\mathrm{f}(x)=a^{x}$ with $0<a<1$ or $a>1$ <br> absolute value $\mathrm{f}(x)=\|a x+b\|$ <br> trigonometric $\quad \mathrm{f}(x)=a \sin (b x) ; a \cos (b x) ; \tan x$ | some of $a, b, c$ or $d$ may be 0 <br> compound interest <br> including period and amplitude | modelling 7.6 7.8 7.8 8.8 |
| 3.3 | Determination of at most two of $a, b, c$ or $d$ in simple cases of 3.2 |  | modelling |
| 3.4 | Finding the quadratic function given vertex and another point, $x$-intercepts and a point, vertex or $x$-intercepts with $a=1$. |  |  |
| 3.5 | Understanding of the concept of asymptotes and identification of examples <br> Simple tangent |  |  |
| 3.6 | Use of a graphics calculator to: <br> sketch the graph of a function <br> produce a table of values <br> find zeros, local maxima or minima <br> find the intersection of the graphs of functions | including unfamiliar functions vertex of quadratic | $\begin{array}{\|l\|l} 2.10 \\ 2.11 \end{array}$ |
| 3.7 | Simplified formulae for expressions such as $f(g(x))$ where $g(x)$ is a linear expression |  |  |
| 3.8 | Description and identification, using the language of transformations, of the changes to the graph of $y=\mathrm{f}(x)$ when $y=\mathrm{f}(x)+k, \quad y=k \mathrm{f}(x), \quad y=\mathrm{f}(x+k)$ | $k$ an integer | $\begin{array}{\|l} 5.4 \\ 3.4 \end{array}$ |
| 3.9 | Inverse function $f^{-1}$ |  | 5.5 |
| 3.10 | Logarithmic function as the inverse of the exponential function <br> $y=a^{x}$ equivalent to $x=\log _{a} y$ <br> Rules for logarithms corresponding to rules for exponents <br> Solution to $a^{x}=b$ as $x=\log b / \log a$. |  |  |

## CURRICULUM CONTENT (Core) continued

| 4 | GEOMETRY |  |  |
| :--- | :--- | :--- | :--- |
| 4.1 | Vocabulary: <br> acute, obtuse, right angle, reflex, parallel, perpendicular, <br> equilateral, isosceles, congruent, similar, regular, pentagon, <br> hexagon, octagon, rectangle, square, kite, rhombus, <br> parallelogram, trapezium |  |  |
| 4.2 | Line and rotational symmetry | 7.8 |  |
| 4.3 | Angle measurement in degrees |  |  |
| 4.4 | Angles round a point <br> Angles on a straight line and intersecting straight lines <br> Vertically opposite angles <br> Alternate and corresponding angles on parallel lines <br> Angle sum of a triangle, quadrilateral and polygons <br> Angles of regular polygons |  |  |
| 4.5 | Similarity <br> Calculation of lengths of similar figures | 1.5 |  |
| 4.6 | Theorem of Pythagoras in two dimensions <br> Including: <br> chord length and its distance of a chord from the centre <br> of a circle <br> distances on a grid | 7.2 |  |
| 4.7 | Properties of circles <br> tangent perpendicular to radius at the point of contact <br> tangents from a point <br> angle in a semicircle |  |  |

## CURRICULUM CONTENT (Extended) continued

| 4 | GEOMETRY |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 4.1 | Vocabulary: <br> acute, obtuse, right angle, reflex, parallel, perpendicular, <br> equilateral, isosceles, congruent, similar, regular, pentagon, <br> hexagon, octagon, rectangle, square, kite, rhombus, <br> parallelogram, trapezium |  | A |  |
| 4.2 | Line and rotational symmetry |  |  |  |
| 4.3 | Angle measurement in degrees |  | A |  |
| 4.4 | Angles round a point <br> Angles on a straight line and intersecting straight lines <br> Vertically opposite angles <br> Alternate and corresponding angles on parallel lines <br> Angle sum of a triangle, quadrilateral and polygons <br> Angles of regular polygons |  | 1.5 |  |
| 4.5 | Similarity <br> Calculation of lengths of similar figures <br> Area and volume scale factors | 5.3 | 7.2 |  |
| 4.6 | Theorem of Pythagoras and its converse in two and three <br> dimensions <br> Including: <br> chord length and its distance of a chord from the centre <br> of a circle <br> distances on a grid |  |  |  |
| 4.7 | Properties of circles: <br> tangent perpendicular to radius at the point of contact <br> tangents from a point <br> angle in a semicircle <br> angles at the centre and at the circumference on the <br> same arc <br> cyclic quadrilateral |  |  |  |

## CURRICULUM CONTENT (Core) continued

| $\mathbf{5}$ | TRANSFORMATIONS <br> IN TWO DIMENSIONS |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :---: | :---: | :---: |
| 5.1 | Notation: <br> Directed line segment $\overrightarrow{A B}$; component form $\binom{x}{y}$ |  |  |  |  |  |
| 5.2 |  |  | 3.8 |  |  |  |
| 5.3 | (ransformations on the cartesian plane <br> translation, reflection, rotation, enlargement <br> (reduction) |  |  |  |  |  |
| 5.4 | Description of a translation using the Notation in 5.1 |  |  |  |  |  |
| 5.5 | Tr |  |  |  |  |  |
| 5.6 |  |  |  |  |  |  |

| 6 | MENSURATION |  |  |  |  |
| :--- | :--- | :--- | :--- | :---: | :---: |
| 6.1 | Units: $\mathrm{mm}, \mathrm{cm}, \mathrm{m}, \mathrm{km}$ <br> $\mathrm{mm}^{2}, \mathrm{~cm}^{2}, \mathrm{~m}^{2}, \mathrm{ha}, \mathrm{km}^{2}$ <br> $\mathrm{~mm}^{3}, \mathrm{~cm}^{3}, \mathrm{ml}, \mathrm{cl}, \mathrm{l}, \mathrm{m}^{3}$ <br> $\mathrm{~g}, \mathrm{~kg}, \mathrm{t}$ | convert between units |  |  |  |
| 6.2 | Perimeter and area of rectangle, triangle and compound <br> shapes derived from these. | formula given for area of triangle | 4.1 |  |  |
| 6.3 | Circumference and area of a circle <br> Arc length and area of sector | formulae given |  |  |  |
| 6.4 | Surface area and volume of prism and pyramid <br> (in particular, cuboid, cylinder and cone) <br> Surface area and volume of sphere | formulae given for curved areas <br> of cylinder, cone and sphere; <br> volume of pyramid, cone, <br> cylinder, prism and sphere |  |  |  |
| 6.5 | Areas of compound shapes |  |  |  |  |

## CURRICULUM CONTENT (Extended) continued

| $\mathbf{5}$ | TRANSFORMATIONS \& VECTORS <br> IN TWO DIMENSIONS |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 5.1 | Notation: <br> Vector a; directed line segment $\overrightarrow{A B} ;$ component form $\binom{x}{y}$ |  |  |  |
| 5.2 | Addition of vectors using directed line segments or number <br> pairs <br> Negative of a vector, subtraction of vectors <br> Multiplication of a vector by a scalar |  | 4.6 | 7.2 |
| 5.3 | Magnitude \| a $~$ |  | 3.8 |  |
| 5.4 | Transformations on the cartesian plane: <br> translation, reflection, rotation, enlargement <br> (reduction), stretch |  |  |  |
| 5.5 | Description of a translation using the Notation in 5.1 |  | 3.9 |  |
| 5.6 | Combined transformations |  |  |  |

| 6 | MENSURATION |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 6.1 | Units: $\mathrm{mm}, \mathrm{cm}, \mathrm{m}, \mathrm{km}$ $\mathrm{mm}^{2}, \mathrm{~cm}^{2}, \mathrm{~m}^{2}$, ha, $\mathrm{km}^{2}$ $\mathrm{mm}^{3}, \mathrm{~cm}^{3}, \mathrm{ml}, \mathrm{cl}, \mathrm{l}, \mathrm{m}^{3}$ $\mathrm{g}, \mathrm{kg}, \mathrm{t}$ | convert between units |  | A |
| 6.2 | Perimeter and area of rectangle, triangle and compound shapes derived from these |  | 4.1 | A |
| 6.3 | Circumference and area of a circle Arc length and area of sector |  |  |  |
| 6.4 | Surface area and volume of prism and pyramid (in particular, cuboid, cylinder and cone) <br> Surface area and volume of sphere | formulae given for curved areas of cylinder, cone and sphere; volume of pyramid, cone, cylinder, and sphere |  |  |
| 6.5 | Areas and volumes of compound shapes |  |  |  |

## CURRICULUM CONTENT (Core) continued

| 7 | CO-ORDINATE GEOMETRY |  |  |
| :--- | :--- | :--- | :--- |
| 7.1 | Plotting of points and reading from a graph in the cartesian <br> plane |  | 11.1 |
| 7.2 | Distance between two points |  | 4.6 |
| 7.3 | Midpoint of a line segment |  |  |
| 7.4 | Gradient of a line segment |  |  |
| 7.5 | Gradient of parallee lines |  | 4.2 |
| 7.6 | Equation of a straight line as $y=m x+c$ or $x=k$ |  |  |
| 7.7 |  |  |  |
| 7.8 | Symmetry of diagrams or graphs in the cartesian plane |  |  |

| 8 | TRIGONOMETRY |  |  |
| :---: | :---: | :---: | :---: |
| 8.1 | Right-angled triangle trigonometry |  |  |
| 8.2 |  |  |  |
| 8.3 |  |  |  |
| 8.4 |  |  |  |
| 8.5 |  |  |  |
| 8.6 |  |  |  |
| 8.7 | Applications: <br> three-figure bearings and North, East, South, West problems in two dimensions compound shapes |  |  |
| 8.8 |  |  |  |

## CURRICULUM CONTENT (Extended) continued

| 7 | CO-ORDINATE GEOMETRY |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 7.1 | Plotting of points and reading from a graph in the cartesian <br> plane |  | 11.1 |  |
| 7.2 | Distance between two points |  | 4.6 | 5.3 |
| 7.3 | Midpoint of a line segment |  |  |  |
| 7.4 | Gradient of a line segment |  | 3.2 |  |
| 7.5 | Gradient of parallel and perpendicular lines |  |  |  |
| 7.6 | Equation of a straight line as $y=m x+c$ <br> and $a x+b y=d(a, b$ and $d$ integer $)$ | shade unwanted regions | 3.2 | 4.2 |
| 7.7 | Linear inequalities on the cartesian plane |  |  |  |
| 7.8 | Symmetry of diagrams or graphs in the cartesian plane |  |  |  |

| 8 | TRIGONOMETRY |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 8.1 | Right-angled triangle trigonometry |  |  |  |
| 8.2 | Exact values for the trig ratios of $0^{\circ}, 30^{\circ}, 45^{\circ}, 60^{\circ}, 90^{\circ}$ |  |  |  |
| 8.3 | Extension to the four quadrants i.e. $0-360^{\circ}$ | formula given, ASA <br> SSA (ambiguous case) |  |  |
| 8.4 | Sine Rule | formula given, SAS, SSS |  |  |
| 8.5 | Cosine Rule | formula given |  |  |
| 8.6 | Area of triangle | Applications: <br> three-figure bearings and North, East, South, West <br> problems in two and three dimensions <br> compound shapes | $x$ in degrees |  |
| 8.7 | Properties of the graphs of $y=\sin x, y=\cos x, y=\tan x$ |  |  |  |
| 8.8 |  |  |  |  |

## CURRICULUM CONTENT (Core) continued

| 9 | SETS |  |  |
| :--- | :--- | :--- | :--- |
| 9.1 | Notation and meaning for: <br> is an element of $(\in)$; is not an element of $(\notin) ;$ <br> is a subset of $(\subseteq)$; is a proper subset of $(\subset) ;$ <br> universal set U, empty set $\varnothing$ or $\} ;$ <br> complement of $A,\left(A^{\prime}\right) ;$ number of elements in $A, \mathrm{n}(A)$. |  |  |
| 9.2 | Sets in descriptive form $\{x \mid \quad\}$ or as a list |  | 2.1 |
| 9.3 | Venn diagrams with at most two sets |  | 10.6 |
| 9.4 | Intersection and union of sets |  |  |

| 10 | PROBABILITY |  |  |
| :--- | :--- | :--- | :--- |
| 10.1 | Probability $P(A)$ as a fraction, decimal or percentage <br> Significance of its value |  |  |
| 10.2 | Relative frequency as an estimate of probability |  |  |
| 10.3 | Expected number of occurrences | mutually exclusive <br> independent <br> simple cases only |  |
| 10.4 | Combining events: <br> the addition rule $P(A$ or $B)=P(A)+P(B)$ <br> the multiplication rule $P(A$ and $B)=P(A) \times P(B)$ | simple cases only | 9.3 |
| 10.5 | Tree diagrams including successive selection with or without <br> replacement | Probabilities from Venn diagrams and tables |  |
| 10.6 | Pres |  |  |

## CURRICULUM CONTENT (Extended) continued

| 9 | SETS |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 9.1 | Notation and meaning for: <br> is an element of $(\in)$; is not an element of $(\notin) ;$ <br> is a subset of $(\subseteq) ;$ is a proper subset of $(\subset) ;$ <br> universal set U, empty set $\varnothing$ or $\{~\} ;$ <br> complement of $A,\left(A^{\prime}\right) ;$ number of elements in $A, \mathrm{n}(A)$ |  |  |  |
| 9.2 | Sets in descriptive form $\{x \mid$ | or as a list |  | 2.1 |
| 9.3 | Venn diagrams with at most three sets |  | 10.6 |  |
| 9.4 | Intersection and union of sets |  |  |  |

| 10 | PROBABILITY |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 10.1 | Probability $\mathrm{P}(A)$ as a fraction, decimal or percentage <br> Significance of its value |  |  |
| 10.2 | Relative frequency as an estimate of probability |  |  |
| 10.3 | Expected number of occurrences | mutually exclusive <br> independent |  |
| 10.4 | Combining events: <br> the addition rule $\mathrm{P}(A$ or $B)=\mathrm{P}(A)+\mathrm{P}(B)$ <br> the multiplication rule $\mathrm{P}(A$ and $B)=\mathrm{P}(A) \times \mathrm{P}(B)$ |  |  |
| 10.5 | Tree diagrams including successive selection with or without <br> replacement |  | 9.3 |
| 10.6 | Probabilities from Venn diagrams and tables |  |  |

## CURRICULUM CONTENT (Core) continued

| 11 | STATISTICS |  |  |
| :--- | :--- | :--- | :--- |
| 11.1 | Reading and interpretation of graphs or tables of data |  | 7.1 |
| 11.2 | Discrete and continuous data |  |  |
| 11.3 | (Compound) bar chart, line graph, pie chart, stem-and-leaf <br> plot, scatter diagram |  |  |
| 11.4 | Mean, mode, median, quartiles and range from lists of <br> discrete data <br> Mean, mode, median and range from grouped discrete data |  |  |
| 11.5 | Mean from continuous data | read from curve |  |
| 11.6 |  | Cumulative frequency table and curve <br> Median, quartiles and inter-quartile range |  |
| 11.8 | Use of a graphics calculator to calculate mean, median and <br> quartiles for discrete data and mean for grouped data | the coefficient of correlation is <br> not required |  |
| 11.9 | Understanding and description of correlation with reference <br> to a scatter diagram <br> Straight line of best fit (by eye) through the mean on a scatter <br> diagram |  |  |

## CURRICULUM CONTENT (Extended) continued

| 11 | STATISTICS |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 11.1 | Reading and interpretation of graphs or tables of data |  | 7.1 | A |
| 11.2 | Discrete and continuous data |  |  |  |
| 11.3 | (Compound) bar chart, line graph, pie chart, stem-and-leaf <br> plot, scatter diagram |  |  |  |
| 11.4 | Mean, mode, median, quartiles, range from lists of discrete <br> data <br> Mean, mode, median and range from grouped discrete data |  |  |  |
| 11.5 | Mean from continuous data |  |  |  |
| 11.6 | Histograms with frequency density on the vertical axis |  |  |  |
| 11.7 | Cumulative frequency table and curve <br> Median, quartiles, percentiles and inter-quartile range | read from curve |  |  |

## APPENDIX

## LIST OF FORMULAE FOR CORE TIER

Area, $A$, of triangle, base $b$, height $h$.
$A=\frac{1}{2} b h$
Area, $A$, of circle, radius $r$.
Circumference, $C$, of circle, radius $r$.
Curved surface area, $A$, of cylinder of radius $r$, height $h$.
$A=2 \pi r h$
Curved surface area, $A$, of cone of radius $r$, sloping edge $l$.
$A=\pi r l$
Curved surface area, $A$, of sphere of radius $r$.
$A=4 \pi r^{2}$
Volume, $V$, of prism, cross-sectional area $A$, length $l$.
$V=A l$

Volume, $V$, of pyramid, base area $A$, height $h$.
$V=\frac{1}{3} A h$
Volume, $V$, of cylinder of radius $r$, height $h$.
$V=\pi r^{2} h$

Volume, $V$, of cone of radius $r$, height $h$.

Volume, $V$, of sphere of radius $r$.
$V=\frac{1}{3} \pi r^{2} h$ $V=\frac{4}{3} \pi r^{3}$

## LIST OF FORMULAE FOR EXTENDED TIER

Curved surface area, $A$, of cylinder of radius $r$, height $h . \quad A=2 \pi r h$
Curved surface area, $A$, of cone of radius $r$, sloping edge $l . \quad A=\pi r l$
Curved surface area, $A$, of sphere of radius $r$.

Volume, $V$, of pyramid, base area $A$, height $h$.
$V=\frac{1}{3} A h$
Volume, $V$, of cylinder of radius $r$, height $h$.
$V=\pi r^{2} h$

Volume, $V$, of cone of radius $r$, height $h$.
$V=\frac{1}{3} \pi r^{2} h$

Volume, $V$, of sphere of radius $r$. $V=\frac{4}{3} \pi r^{3}$

$\frac{a}{\sin A}=\frac{b}{\sin B}=\frac{c}{\sin C}$
$a^{2}=b^{2}+c^{2}-2 b c \cos A$

Area $=\frac{1}{2} b c \sin A$

For the equation $a x^{2}+b x+c=0 \quad x=\frac{-b \pm \sqrt{b^{2}-4 a c}}{2 a}$
