Paper 3 Practical Test

October/November 2011

CONFIDENTIAL INSTRUCTIONS

1 hour 15 minutes

Great care should be taken to ensure that any confidential information given does not reach the candidates either directly or indirectly.

If you have any problems or queries regarding these Instructions, please contact CIE
by e-mail: International@cie.org.uk
by phone: +44 1223 553554
by fax: +44 1223 553558
stating the Centre number, the nature of the query and the syllabus number quoted above.

This document consists of **5** printed pages and **3** blank pages.

READ THESE INSTRUCTIONS FIRST

These instructions give details of the apparatus required by each candidate for each experiment in this paper. A summary of the questions that will be presented to the candidates is included, where appropriate, to allow the Biology teacher to test the apparatus appropriately. **No access to the question paper is permitted in advance of the examination session.**

If a candidate breaks any of the apparatus, or loses any of the material supplied, the matter should be rectified and a note made in the Supervisor's Report.

If arrangements are made for different sessions for different groups of candidates, care must be taken to ensure that the different groups of candidates are effectively isolated so that **no information passes between them.**

Supervisors are advised to remind candidates that **all** substances in the examination should be treated with caution. Pipette fillers and safety goggles should be used where necessary.

In accordance with COSHH (Control of Substances Hazardous to Health) Regulations, operative in the UK, a hazard appraisal of the examination has been carried out.

The following codes are used in the left margin where relevant.

C = corrosive substance

F = highly flammable substance

H = harmful or irritating substance

O = oxidising substance

T = toxic substance

Instructions to Supervisors

Each candidate must be supplied with:

For question 1

- (i) Piece of celery (the petiole), about 5 cm long, fresh and dry.
- (ii) Slice of Irish potato tuber, *Solanum tuberosum*, with no peel (skin), 2 cm thick, 5 cm or more in diameter.
- (iii) Scalpel or sharp knife.
- (iv) Forceps.
- (v) Iodine in KI solution, with pipette dispenser, labelled 'Iodine solution'.
- (vi) White tile.
- (vii) Paper towels.
- (viii) Access to tap and sink.
- (ix) Hand lens.
- (x) Ruler, mm.

For question 2

- (i) Specimen labelled **W1** – white of hard-boiled egg (no yolk). Each candidate will require approximately 1 cm³
- (ii) Specimen labelled **W2** – a piece of fresh or dried coconut flesh, approximately 1 cm³.
- (iii) Six test-tubes, in supporting rack, with means of labelling test-tubes.
- [F][H]** (iv) Ethanol (industrial methylated spirit), 25–30 cm³, in test-tube, labelled 'Ethanol'.
- (v) Biuret reagent, labelled and in form familiar to candidates.
- (vi) Spatula.
- (vii) Supply of distilled water, with pipette, labelled.
- (viii) Scalpel or sharp knife (can be the one used in question 1, if washed).
- (ix) Other apparatus from question 1.

Note: Ethanol is flammable, therefore no naked flames such as lighted Bunsen burners must be in the laboratory during the examination.

- 3 A plan of work benches, giving details of the candidate numbers of the places occupied by the candidates for each session, must be enclosed with the scripts. The space below can be used for this, or it may be on separate paper.

Declaration (to be signed by the Principal)

The preparation of this practical examination has been carried out so as to maintain fully the security of the examination.

Signed

Name (in block capitals)

Centre number

Centre name

If scripts are required by CIE to be despatched in more than one envelope, it is essential that a copy of the relevant Supervisor's report and the appropriate seating plan(s) are sent inside **each envelope**.
