UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

MARK SCHEME for the May/June 2011 question paper for the guidance of teachers

5070 CHEMISTRY

5070/32

Paper 3 (Practical Test), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	GCE O LEVEL – May/June 2011	5070	32

1 (a) Titration [12]

Accuracy 8 marks

For the two best titres give:

- 4 marks for a value within 0.2 cm³ of Supervisor
- 2 marks for a value within 0.3 cm³ of Supervisor
- 1 mark for a value within 0.4 cm³ of Supervisor

Concordance 3 marks

Give:

- 3 marks if all the ticked values are within 0.2 cm³
- 2 marks if all the ticked values are within 0.3 cm³
- 1 mark if all the ticked values are within 0.4 cm³

Average 1 mark

Give 1 mark if the candidate calculates a correct average (error not greater than 0.05) of all the ticked values.

Assuming a 25 cm³ pipette and a titre of 24.8 cm³:

(b) concentration of iodine in P

$$=\frac{24.8\times0.1}{2\times25}$$
 (1)

 $= 0.0496 \, \text{mol/dm}^3 \, (1)$

Answers should be correct to + or -1 in the third significant figure.

(c) mass of iodine in 1 dm³ of P

[1]

- $= 0.0496 \times 254$
- = 12.6 g

(d) amount of iodine present in seaweed

[1]

- = 12.6 × 1000000 / 15000
- = 840 ppm

[Total: 16]

2 R is hydrochloric acid S is sodium hydroxide

Test			Notes
Genera	points		
For ppt Allow so	olid, suspension, powder		
For gase	es f gas requires test to be at least partiall	lνα	correct
	ces = bubbles = gas vigorously evolve		
Solution	s		
	ess not equivalent to clear, clear not eq	uiv	valent to colourless
Solution	R		
Test 1			
efferves	cence (1	1)	
gas turn	s limewater milky (*	1)	
carbon o	•	1) 1)	
Test 2	appears (')	
(a)	white ppt (*	1)	
(b)		1)	
	colourless solution (*	1)	
Test 3			
(a)	effervescence (*	1)	
		1)	
		1) 1)	
	, •	1)	
(b)	white ppt (*	1)	
, ,		1)	
Test 4			
white pp		1)	
soluble in excess (1) colourless solution (1)			
Test 5	จจ จบเนเบา (1)	
(a)		1)	
	•	1) 1)	
(h)	green ppt (*	1)	
	soluble in excess (*	1)	
	green solution (1)

Test 6		
gas turns damp litmus blue ammonia	(1) (1)	

Conclusions

Cation in **R** is hydrogen (indication of gas in test **1** or **3(a)**) (1)
Anion in **R** is chloride (white ppt in test **2(a)**) (1)
Anion in **S** is hydroxide (ammonia in test **6** or ppt in test **3(b)**, **4** or **5**) (1)

Note: 28 marking points, maximum 24.
