MARK SCHEME for the October/November 2007 question paper

5070 CHEMISTRY

5070/03

Paper 3 (Practical Test), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2007 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme	Syllabus	Paper
	GCE O LEVEL – October/November 2007	5070	03

1 (a) Titration

Accuracy 10 marks

For the two best titres give:

	for a value within 0.2 cm ³ of supervisor
3 marks	for a value within 0.3 cm ³ of supervisor
	for a value within 0.4 cm ³ of supervisor
1 mark	for a value within 0.5 cm ³ of supervisor

Concordance 3 marks

Give:

3 marks	if all the ticked values are within 0.2 cm ³
2 marks	if all the ticked values are within 0.3 cm ³
1 mark	if all the ticked values are within 0.4 cm ³

Average 1 mark

Give 1 mark if the candidate calculates a correct average (error not greater than 0.05) of all his ticked values.

[14]

Page 3	Mark Scheme	Syllabus	Paper
	GCE O LEVEL – October/November 2007	5070	03

(b) Assuming a 25 cm³ pipette and a titre of 24.6 cm³

Concentration of hydrochloric acid, in mol/dm³

conc =
$$\frac{25.0 \times 0.1}{24.6}$$
 (1)
= 0.102 (correct to 0.001) (1) [2]

(c)(d) R + P

Effervesces (bubbles etc) (1)

Turns limewater milky etc. (1)

Carbon dioxide evolved (1)

Colourless or clear solution remains or partially soluble or some dissolves (1)

 $ZnCO_3$ circled or indicated (1) Carbon dioxide named or tested for (with limewater) or effervesces etc. [5]

	GCE O LEVEL – October/November 2007	5070	03

Question 2

S is Cu(NH₃)₄SO₄

[23]

Test	Notes
General points	·
For ppt	
allow solid, suspension, powder	
For gases	
Name of gas requires test to be at least partially of	
Effervesces = bubbles = gas vigorously evolved (but not just gas evolved)
Solutions	
Colourless not equivalent to clear, clear not equiv	alent to colourless
Test 1	
4 marks	
Blue ppt (1)	Allow shades of blue here and elsewhere. Allow blue/green here but not elsewhere (for ppts)
Turns black (1)	Allow brown, no need to link to solid, allow brown 'stain' etc.
Gas turns litmus blue (1)	Allow turns litmus blue (without gas) if ammonia mentioned, fumes with HC <i>l</i>
Ammonia (1)	
Test 2	
4 marks	
Blue ppt (2)	Give one mark for ppt of whatever colour. Mixed coloured (white ppt + blue ppt) do not score the colour mark here or in Test 3
Soluble in acid (1)	
Blue solution (1)	Allow green but not colourless
	Allow paler blue solution even if ppt remains
Test 3 4 marks	
White ppt (2)	Give one mark for ppt of whatever colour.
Insoluble in acid (1)	
Solution becomes colourless (1) or paler	Allow pale blue but not blue unless solution earlier is dark blue

GCE O LEVEL - (Test 4 9 marks No initial reaction with KI (1) + acid White ppt (2) Yellow or brown solution (1) + thiosulphate White ppt (1) Solution is now colourless (1) Ppt dissolves(1) Colourless solution (1) White ppt reforms (1)	October/November 2007507003Allow slight colour change but not (turns) blue Any implication of a reaction effervesces loses thisGive one mark for a ppt of any colour. Give the col ppt mark for anything than is paler/yellower than b Ignore the order in which the colours appear and i colours. Not orange for colour of pptBoth colour and solution required if ppt mentioned turns yellow/brown (1) if nothing else in part (b), orange for solutionAllow pale pink, pale lilac for white	our of rown. mixed
9 marks No initial reaction with KI (1) + acid White ppt (2) Yellow or brown solution (1) + thiosulphate White ppt (1) Solution is now colourless (1) Ppt dissolves(1) Colourless solution (1)	Any implication of a reaction effervesces loses this Give one mark for a ppt of any colour. Give the col- ppt mark for anything than is paler/yellower than b Ignore the order in which the colours appear and r colours. Not orange for colour of ppt Both colour and solution required if ppt mentione turns yellow/brown (1) if nothing else in part (b), orange for solution	our of rown. mixed
 + acid White ppt (2) Yellow or brown solution (1) + thiosulphate White ppt (1) Solution is now colourless (1) Ppt dissolves(1) Colourless solution (1) 	Any implication of a reaction effervesces loses this Give one mark for a ppt of any colour. Give the col- ppt mark for anything than is paler/yellower than b Ignore the order in which the colours appear and r colours. Not orange for colour of ppt Both colour and solution required if ppt mentione turns yellow/brown (1) if nothing else in part (b), orange for solution	our of rown. mixed
White ppt (2) Yellow or brown solution (1) + <i>thiosulphate</i> White ppt (1) Solution is now colourless (1) Ppt dissolves(1) Colourless solution (1)	ppt mark for anything than is paler/yellower than b Ignore the order in which the colours appear and i colours. Not orange for colour of ppt Both colour and solution required if ppt mentione turns yellow/brown (1) if nothing else in part (b), orange for solution	rown. mixed
Yellow or brown solution (1) + <i>thiosulphate</i> White ppt (1) Solution is now colourless (1) Ppt dissolves(1) Colourless solution (1)	ppt mark for anything than is paler/yellower than b Ignore the order in which the colours appear and i colours. Not orange for colour of ppt Both colour and solution required if ppt mentione turns yellow/brown (1) if nothing else in part (b), orange for solution	rown. mixed
+ <i>thiosulphate</i> White ppt (1) Solution is now colourless (1) Ppt dissolves(1) Colourless solution (1)	turns yellow/brown (1) if nothing else in part (b), orange for solution	
White ppt (1) Solution is now colourless (1) Ppt dissolves(1) Colourless solution (1)	Allow pale pink, pale lilac for white	
Solution is now colourless (1) Ppt dissolves(1) Colourless solution (1)	Allow pale pink, pale lilac for white	
Ppt dissolves(1) Colourless solution (1)		
Colourless solution (1)		
	Forms a colourless solution (2)	
White ppt reforms (1)		
	Allow any pale colour ppt or even turns cloudy/mi white solution at this stage i.e. after the earlier whi has dissolved	
Conclusion 2 marks		
Allow any two of		
Cu ²⁺ or copper(II) (1)		
SO_4 ^{2–} or sulphate (1)	Ppt of any colour in Test 3	
NH₄ ⁺or ammonium (1)	Ammonia named or tested for in Test 1
