## MARK SCHEME for the October/November 2011 question paper

## for the guidance of teachers

## **5070 CHEMISTRY**

5070/42

Paper 4 (Alternative to Practical), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	GCE O LEVEL – October/November 2011	5070	42
<b>(a)</b> B (1)			
(b) pipette (1)			

- 2 (a) (i) insoluble (in water) <u>not</u> slightly soluble (1)
  - (ii) catalyst or speeds up reaction or dehydrating agent (1)
  - (iii)  $CH_2 = CH_2(1)$
  - (b) (i) yellow, brown or orange (1)
    - (ii) colourless or decolourised (1)
    - (iii) addition or saturation (1) not bromination
  - (c) (i) butene ignore 1 or 2 in name (1)  $CH_3CH_2CH=CH_2$  etc (1) [8]
- **3 (a)** sea water is higher as it contains impurities, or dissolved salts (which increases the boiling point) (1)
  - (b) NaCl(1)
  - (c) (i) <u>flask</u> containing water (by label or observation) together with heat either shown as a bunsen or heating block or arrows labelled heat (1)

<u>condenser</u> showing outer and inner tube, sloping in correct direction, water labelled entering and leaving at correct points, (1) (no vertical condensers)

receiver <u>and</u> all the apparatus connected correctly (1) No blockages Ignore use of thermometer and fractionating tube

- (ii) desalination or reversed osmosis (1)
- (d) filtration or sedimentation or centrifugation (1)
- (e) chlorine (1) bleaches or decolourises litmus (1)
