

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS General Certificate of Education Ordinary Level

Paper 1		October/November 20		
COMPUTER S	TUDIES		7010/11	
CENTRE NUMBER		CANDIDATE NUMBER		
CANDIDATE NAME				
CANDIDATE				

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use	

2 hours 30 minutes

This document consists of 19 printed pages and 1 blank page.

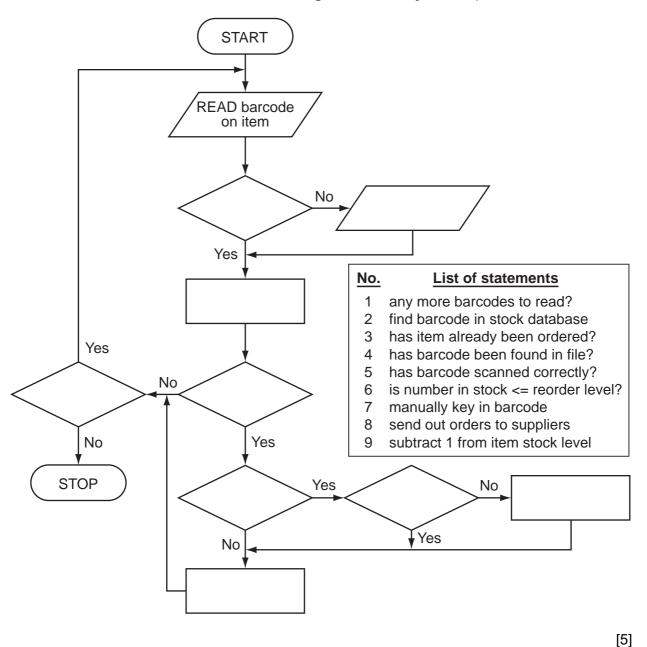

1	
2	
3	
	rs
a) Give one benefit of storing music files in MP3 forr	nat.
	r
b) Describe the type of memory used in MP3 players	3.
	[2
Give three features expected in a data protection act.	
	[

4 The following flowchart shows how barcodes are used at the point of sale in an automatic stock control system.

For Examiner's Use

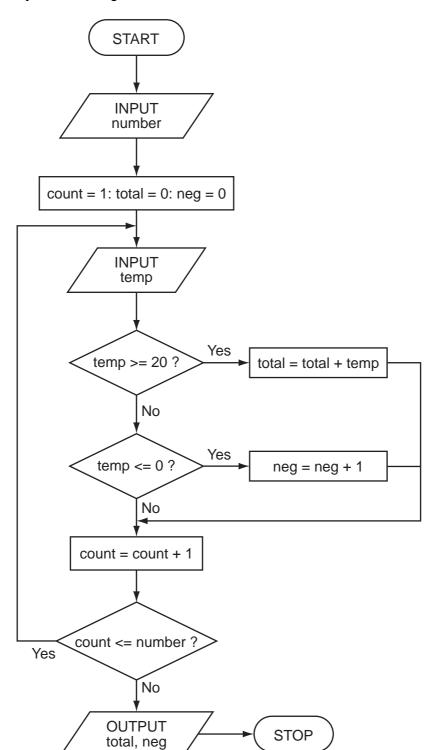

Select statements from the list below, using numbers only, to complete the flowchart.

5	(a)	State what is meant by Computer Aided Design (CAD).	 Exa
		[1]	
	(b)	Give three different applications that make use of CAD.	
		1	
		2	
		3	
		[3]	
	(c)	Name three specialist input/output devices used in CAD.	
		1	
		2	
		3	
		[3]	

6	(a)	Name two pieces of hardware needed to enable video-conferencing to take place using a standard computer system.
		1
		2
		[2]
	(b)	State one piece of specialist software needed to carry out video-conferencing.
		[1]
	, ,	
	(c)	A company has decided to use video-conferencing rather than instant messaging.
		(i) Give one advantage of doing this.
		(ii) Give one disadvantage of doing this.
		[2]
		[2]
	(d)	Give one reason why use of video-conferencing has increased over the last ten years.
		[1]

7 Carefully study the following flowchart:

Complete the trace tables for the following two sets of test data:

- (i) number = 7, temp = -5, 0, 5, -4, 0, 10, -2
- (ii) number = 6, temp = 21, 20, 30, 19, 21, 15

(i) trace table:

number	count	temp	total	neg	OUTPUT

(ii) trace table:

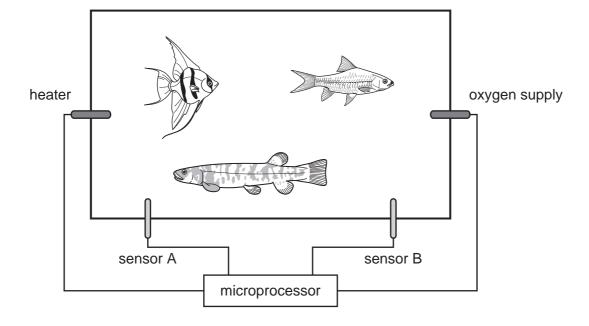

number	count	temp	total	neg	OUTPUT

4 s	prea	idsneet na	is been designed to	o calculate the fuel eco	onomy for 6 cars:	
		Α	В	С	D	
	1	car	distance (km)	fuel used (litres)	economy (km/litre)	
	2	car 1	48	4.0	12.0	
	3	car 2	160	9.0	17.8	
	4	car 3	70	4.5	15.6	
	5	car 4	200	20.0	10.0	
	6	car 5	150	33.0	4.5	
	7	car 6	300	15.0	20.0	
	8			average economy:	13.3	
	9			best economy:	20.0	
(a)	(i) (ii)			calculate the econon	ny for car 1?e economy for all 6 cars?	,
	/:::	What for	mula is in cell D9 to	o calculate the best (hi	ahest) economy?	
	(1111)	vviiat ioi	maia io in oon bo k	o calculate the boot (m	gricoty doctrorry.	
	(111)					
	(111)					
	(111)					
	(111)					
(b)	•	ell B7 was	changed to 200, v	which cells would be a	utomatically updated?	
(b)	•	ell B7 was	changed to 200, v	vhich cells would be a	utomatically updated?	
(b)	•	ell B7 was	s changed to 200, v	vhich cells would be a	utomatically updated?	

	(c)	Fuel economy is often given in the form litres per 100 km . A column E is to be added to the spreadsheet to contain these new economy values.
		What formula needs to be in E7 to find the economy of car 6 in litres per 100 km?
		[2]
10		company's technical services are now available on the Internet as well as using call tres.
	(a)	Give two advantages to the customer of using call centres.
		1
		_
		2
		[2]
	(b)	Give two advantages to the customer of using technical services on the Internet.
		1
		2
		וכו
		[2]
	(c)	Describe two effects on company staff of replacing the call centres with Internet services.
		1
		2
		[2]

11	Cor	Computer memories are measured in terms of the number of bytes.		
	(a)	(i)	What is meant by the term byte?	
		(ii)	What is meant by a Gigabyte?	
			[2]	
	(b)	Fla	sh memories and CD-RWs are used as backing media for computers.	
		Giv	e two differences between these two media.	
		1		

12 The conditions in a fish tank are being controlled using sensors and a microprocessor. To keep the fish healthy, the temperature must be at 25°C and the oxygen content needs to be 20 ppm (parts per million). The tank contains a heater and an oxygen inlet controlled by a valve.

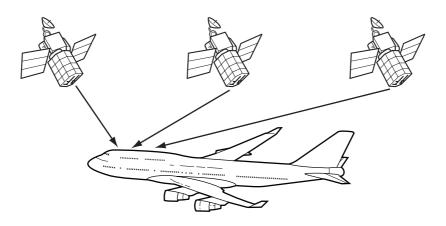

For Examiner's Use

[2]

(a)	Name the two sensors used in this application.
	Sensor A
	Sensor B [2]
(b)	Describe how the sensors and the microprocessor are used to maintain the correct conditions in the fish tank.
	[4]
(c)	What safeguards would be needed to stop the fish tank temperature rising too high?
	[1]

13 Aeroplanes now use Global Positioning Systems (GPS) to determine their location.

(a)	Describe how the computer on board the aeroplane uses GPS to find its exact location.
	[4]
(b)	Give two benefits of using GPS in this application.
	1
	2
	[2]
	[2]

BLANK PAGE

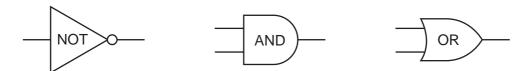

14 An alarm, X, gives a signal (i.e. X = 1) when a car fuel injection system gives certain fault conditions. The inputs are:

For Examiner's Use

input	binary value	condition
D	0	pressure < 5 bar
F	1	pressure >= 5 bar
D	0	revs > 8000 rpm
N.	1	revs <= 8000 rpm
т	0	temp > 120 °C
1	1	temp <= 120 °C

The alarm returns a value of 1 if:

- either (i) pressure < 5 bar AND revs > 8000 rpm
- or (ii) revs <= 8000 rpm AND temp > 120 °C
- (a) Draw the logic circuit for the above system using these logic gates.

(b) Complete the truth table for this alarm system.

Р	R	T	Х
0	0	0	
0	0	1	
0	1	0	
0	1	1	
1	0	0	
1	0	1	
1	1	0	
1	1	1	

For Examiner's Use

[4]

15 A company selling CDs uses a unique 6-digit identification number for each CD title. The right-most digit (position 1) is a *check digit*.

For Examiner's Use

For example,

The validity of the number and check digit is calculated as follows:

- multiply each digit by its digit position
- add up the results of the multiplications
- divide the answer by 11
- if the remainder is 0, the identification number and check digit are valid
- (a) Show whether the following identification numbers are valid or not. You **must** show how you arrived at your answer.

(i)	4 2 1 9 2 3
	working:
	valid or not valid?
(ii)	8 2 0 1 5 6
	working:
	valid or not valid?

(b)	Find the <i>check digit</i> for the following identification number: 5 0 2 4 1	For Examiner's Use
	working:	
	check digit: [2]	
(c)	Describe, with examples, two different types of data entry errors that a check digit would detect.	
	1	
	2	
	[2]	

16	A company has bought some computers which can be used as stand-alone or networked.		
	(a) When used as stand-alone, there is a risk of information being stolen.		
	Give two ways this risk could be removed or minimised.		
		1	
		2	
	(b) There are additional, different security risks when using the computers on a network. Describe two of these risks and how the system can be protected against them.		
		Risk 1	
		Protection	
		Risk 2	
		Protection	
		[4]	
	(c)	The company use a <i>star</i> network which is linked externally to the Internet.	
		(i) Draw a labelled diagram of a star network.	

	(ii)	Another type of network is a <i>ring</i> . Give one advantage of a <i>star</i> network when compared to a <i>ring</i> network.	For Examiner's Use
		[2]	
(d)	The	e company also decides to buy some laptop computers for use on the network.	
	Giv	re two desirable properties you would look for in the laptop processors.	
	1		
	2		
		[2]	

(a)	Write an algorithm, using pseudocode or flowchart only, which:	For
	 inputs three numbers outputs the largest of the three numbers 	Examiner's Use
	[3]	
(b)	Write an algorithm, using pseudocode or flowchart only, which: • inputs 1000 numbers	
	 outputs how many of these numbers were whole numbers (integers) (You may use INT(X) in your answer e.g. Y = INT(3.8) gives the value Y = 3) 	
	[4]
