

## **O Level Woodwork (6030) Frequently Asked Questions**

### **When is the examination available?**

This syllabus is available for examination in November only.

### **What sort of wood should be provided for the practical examination?**

Centres are required to provide their candidates with a straight grained, mild working hardwood. Wood that is very hard puts candidates at a disadvantage.

### **Can candidates take a calculator into the examination?**

Yes.

### **Are there any recommended course books?**

It is difficult to endorse textbooks that have not been written especially for the course and then continually updated. However, books that teachers may find useful are listed elsewhere on this site.
