

## Seven Principles to develop your writing skills

Irrespective of your age factor you can improve your writing skills if you want to. Writing ability is the key of success in the modern era. The following tips will help you develop it.

### 1. Learn Grammar :

No language goes without grammar. Knowledge of grammar is essential for writing, speaking, understanding and listening.

### 2. Increase your word power :

The saurus of words augments your writing power. It also aids in reading . The greater the vocabulary you have the better the author you will be, and you will have a better command over the language.

### 3. Develop reading habit :

Reading helps you in expanding your understanding and knowledge. You become accustomed to the correct structure of the sentence and acquainted with the use of the right word in the right place. Read newspaper, magazines or journals regularly.

### 4. You must have a standard dictionary :

Whenever there is a word whose meaning you don` t know, look up the dictionary and memorize its meaning or meanings.

### 5. Develop writing habit :

Regularly write essay, notes , short stories etc or construct several sentences using a single difficult word.

### 6. Develop your imagination :

Without imagination you cannot write no matter how great vocabulary you have. You can develop your imagination by reading , listening and observing.

### 7. Improve your knowledge of the subject :

If you lack the knowledge of the subject you are unable to write even a single line.
