

**2011**

**Languages: Albanian GA 3: Examination**

## **Oral component**

### **GENERAL COMMENTS**

Students performed very well in the 2011 Albanian oral examination. Students demonstrated a high level of preparation and presentation. They demonstrated very good control and use of correct grammar and expressions. The Detailed Study was presented with accurate emphasis on analysis and discussion.

### **SPECIFIC INFORMATION**

#### **Section 1 – Conversation**

Students performed well in the Conversation section. They were able to expand the discussion on the topics raised, respond to the points raised by the assessors and give examples and opinions.

Students are reminded that developing their own opinions and supporting them with evidence from their research will enhance their performance. Every conversation was different, with students giving clear, spontaneous answers.

#### **Section 2 – Discussion**

Students had prepared to a high standard. It was clear that detailed research and preparation had been carried out, thus giving students confidence in their presentation. Even though all students presented the same topic, each one discussed a different aspect of the research. This not only made the examination interesting but also allowed for the discussion to be extended.
