## ECONOMICS Written examination

**Wednesday 3 November 2004**

**Reading time: 3.00 pm to 3.15 pm (15 minutes)**

**Writing time: 3.15 pm to 5.15 pm (2 hours)**

### QUESTION AND ANSWER BOOK

#### Structure of book

<i>Section</i>	<i>Number of questions</i>	<i>Number of questions to be answered</i>	<i>Number of marks</i>	<i>Suggested times (minutes)</i>
A	15	15	30	30
B	3	3	60	90
			Total 90	120

- Students are permitted to bring into the examination room: pens, pencils, highlighters, erasers, sharpeners and rulers.
- Students are NOT permitted to bring into the examination room: blank sheets of paper and/or white out liquid/tape.
- No calculator is allowed in this examination.

**Materials supplied**

- Question and answer book of 20 pages.
- Answer sheet for multiple-choice questions.
- A script book is available from the supervisor if required.

**Instructions**

- Write your **student number** in the space provided above on this page and on the front cover of any script book used.
- Check that your **name** and **student number** as printed on your answer sheet for multiple-choice questions are correct, **and** sign your name in the space provided to verify this.
- All written responses must be in English.

**At the end of the examination**

- Place the answer sheet for multiple-choice questions inside the front cover of this book. If a script book is used, place it inside the cover of this question and answer book.

**Students are NOT permitted to bring mobile phones and/or any other electronic communication devices into the examination room.**

**SECTION A – Multiple-choice questions****Instructions for Section A**

Answer **all** questions in pencil on the answer sheet provided for multiple-choice questions.

Choose the response that is **correct** or that **best answers** the question.

A correct answer scores 2, an incorrect answer scores 0.

Marks will **not** be deducted for incorrect answers.

No marks will be given if more than one answer is completed for any question.

**Question 1**

Which of the following would most likely decrease as a result of an upturn in the business (economic) cycle?

- A. the rate of inflation
- B. the level of economic activity
- C. the level of imports
- D. the rate of unemployment

**Question 2**

Higher domestic interest rates tend to

- A. encourage spending and discourage saving.
- B. reduce household disposable income and increase aggregate demand.
- C. discourage capital inflow and weaken the value of the Australian dollar.
- D. slow economic activity and increase unemployment.

**Question 3**

As a result of a substantial increase in wages paid to carpenters, we would expect that the price of new houses would

- A. increase as there would be an increase in the demand for new housing across the community.
- B. decrease as there would be a decrease in the demand for new housing across the community.
- C. increase as there would be a decrease in the supply of new housing due to higher production costs.
- D. decrease as there would be an increase in the supply of new housing due to higher production costs.

**Question 4**

With the introduction of pay TV in Australia, television broadcasting in general can no longer be described as a 'public (collective) good' since

- A. 'free-to-air' television broadcasting continues.
- B. consumers are excluded from pay TV unless they pay.
- C. laws exist to keep major sports events on free-to-air TV.
- D. there is rivalry in the consumption of a TV broadcast.

**Question 5**

A relatively low rate of unemployment could be compatible with a low inflation rate if

- A. labour productivity was growing relatively strongly.
- B. the domestic currency was rapidly depreciating.
- C. wages were growing rapidly.
- D. the labour force participation rate increased.

**Question 6**

The most likely automatic effect on the government's budget during a period of sustained expansion in the economy would be to push the budget into

- A. surplus as tax revenue will fall and government transfer payments will rise.
- B. surplus as tax revenue will rise and government transfer payments will fall.
- C. deficit as tax revenue will fall and government transfer payments will rise.
- D. deficit as tax revenue will rise and government transfer payments will fall.

**Question 7**

Which of the following is most likely to lead to the Reserve Bank of Australia increasing interest rates?

- A. an increase in unmet demand for consumer products
- B. a decline in the international competitiveness of Australian exporters
- C. an improvement in Australian labour productivity
- D. an appreciation of the Australian dollar

**Question 8**

A major determinant of demand in one particular market would be

- A. the number of sellers in the market.
- B. the money incomes of buyers in that market.
- C. the technique of production.
- D. the cost of raw materials.

**Question 9**

An appreciation of the Australian dollar relative to other major currencies would most likely

- A. advantage Australian consumers buying imported cars.
- B. disadvantage Australians travelling overseas.
- C. improve the international competitiveness of Australian exporters of manufactured goods.
- D. create more employment opportunities in Australian export industries.

**Question 10**

The table below shows balance of payments data for a country.

	A\$m
Exports of merchandise trade	40 000
Imports of merchandise trade	31 000
Service credits	8 000
Service debits	11 000
Net income and transfers	-5 000

Based on this data, which of the following statements is **not** true?

- A. The balance of merchandise trade is A\$9 000m.
- B. Net services are -A\$3 000m.
- C. The balance on current account is A\$6 000m.
- D. The value of goods and services exported is greater than the value of goods and services imported.

**Question 11**

All else being equal, the increasing popularity of portable 'mp3' music players is likely to have which of the following effects?

- A. an increase in the price and quantity sold of portable CD players
- B. a decline in the price and an increase in the quantity sold of portable mp3 players
- C. a decline in the price of portable CD players and an increase in the quantity sold of portable CD players
- D. a decline in the price and quantity sold of portable CD players

**Question 12**

Which budgetary/fiscal policy measure is likely to have a positive impact on the supply-side of the economy?

- A. reduced government expenditure on the provision of infrastructure
- B. increased company tax rates
- C. increased tax concessions for research and development (R & D)
- D. reduced interest rates

**Question 13**

The table below shows some labour market data for a hypothetical economy.

Year	Number of persons employed (000s)	Labour force (000s)
2003	100	150
2004	200	250

Based on this data, which one of the following statements is **true**?

- A. The unemployment rate in 2004 is exactly the same as in 2003.
- B. The unemployment rate in 2004 is higher than in 2003.
- C. The unemployment rate in 2004 is lower than in 2003.
- D. There is not enough information to determine unemployment rates.

**Question 14**

Which of the following would be an **incorrect** measure of a country's Gross Domestic Product (GDP)?

- A. the total value of expenditure on the final output produced in that country
- B. the total value of the final output produced in that country
- C. the total value of all income earned as a result of producing final output in that country
- D. the total value of currency plus bank deposits in that country

**Question 15**

Lorenz curves for country A and country B.

With reference to the above diagram, which of the following statements is **correct**?

- A. Country A has a more equitable distribution of income than country B.
- B. Country A has a less equitable distribution of income than country B.
- C. The Gini coefficient for country A is equal to 1.
- D. The Gini coefficient for country A is greater than for country B.

**SECTION B – Written responses****Instructions for Section B**

Answer **all** questions in the spaces provided in pen.

**Question 1****Table 1.** Trends in Australian economic growth and unemployment

	GDP % increase chain volume measure	Unemployment rate %
1993–94	3.9	10.2
1994–95	4.3	8.7
1995–96	4.3	8.1
1996–97	3.8	8.3
1997–98	4.5	8.0
1998–99	5.3	7.4
1999–00	4.0	6.6
2000–01	1.8	6.4
2001–02	3.9	6.7
2002–03	2.7	6.1
